

Instructions for Color Digital Photos CD ROM on a IBM compatible PC.

Load your Color Digital Photos CD into your CD-ROM drive.

The bitmap pictures and Windows application files are located on the CD-ROM in the \DOS\ sub directory, Use MS DOS commands or MS Windows file manager to view the \DOS\ sub directory.

\DOS\DISK1\ contains the setup files for installing the PixFolio application, it requires MS Windows 3.1. This program is used to view images and do slide shows.

\DOS\BITMAP\ contains 200 images in 256 colors using the .BMP file format. These images are used by PixFolio to create catalogs and slide shows.

\HIGH_RES\ contains the same 200 images in 24 bit color using the .JPG file type. These images would be used to print in gray scale or color. The picture size is about 5 inches by 7.5 inches when printed at 266 DPI or at a 133 line screen.

To Install PixFolio:

Start MS Windows if it is not already running.

If you want to run Pixfolio from your hard drive, run SETUP.EXE from the \DOS\DISK1\ directory on the CD. Once the SETUP program has installed the Pixfolio files click on "Continue" button. Then click on "OK" button to exit PixFolio Setup.

You need register the program by entering "**1X08AA000534**" into the "Serial" number field and entering your name into the "Name" field.

Using PixFolio:

Double click on the PixFolio icon. Once PixFolio is running you may access the online Help command for specific instructions and explanation of PixFolio menu commands. A quick review of PixFolio features and operating procedures can be gained by reviewing the user guide.

Opening an Image:

Select "Open..." from the "File" menu.

Using the "Open Image" dialog box, establish a path to the \DOS\BITMAP\ or the\HIGH_RES\ sub directory.

Select an image number from the "File Name:" list. Then click on "OK" button.

Building a Catalog:

Change working directory by selecting "C:\PIXFOLIO" from the "File" menu.

Then click "Cancel" button in "Open Image" dialog box.

Select "Select Catalog..." from the "Catalog" menu.

Click button "Create New".

Type title in the "New Catalog Title:" field.

Press "Tab" key, then type catalog file name.

Change contents of the "Path:" field from "C:\PIXFOLIO" to "C:\PIXFOLIO\".

Then click on "OK" button. Then click on "Yes" button.

Select "Build Catalog..." from the "Catalog" menu.

Select your CD-ROM drive from the "Drives:" list.

Select the \DOS\BITMAP\ or the\HIGH_RES\ sub directory.

Click on "Select all" button, Click on "Auto Update" button, Click the "Build" button.

Viewing Catalog and Slide Show:

Select "Select Catalog..." from the "Catalog" menu.

Select catalog name from the "Catalog Title:" list. Then click on "OK" button.

Select "Thumbnail View" from the "Catalog" menu.

Select " Slide Show Options..." from the "Options" menu.

Click on the "Repeat show" button. Then click on "OK" button.

Click right mouse button on any image to display image options list.

Select "Slide Show" from bottom of list. Then click on "Yes" button.

Triple click left mouse button to stop slide show.

Double click on any thumbnail to view the screen size image.
