

Instant File Access

Version 3.01

Bugs Fixed since 3.00

When closing the IFA icon, the Progman no longer becomes active over top of other applications.

All to Common wasn't working when the "**Filename:**" field of the original dialog was a **Combo box**.

When replacing the "**Run:**" command of the **Program Manager** using **All to Common**, some files were not being run properly.

The **Open** and **Save-As** dialogs were not appearing when using the **German** and **Swedish** versions of Windows.

Reworked keyboard area to no use "Keyboard Hook", which caused problems when used with PC Tools 2.00 and Word 6.00 together.
