SAPPHIRE INNOVATIONS

Innovations 1.5.1

A new powerful set of plugins for Adobe®Photoshop® , for PC.

24 incredible plugins.

Colour Add
Boosts/reduces RGB channels using different effects such as emboss effects, colour percentage effects and more.

Colour Flow
Gradient effects. Radial bursts, and more.

Colouring Set
A massive range of RGB colour options to really bring a new twist to any picture. Inverse effects, basic add, colour spotlights, and more.

Cutting Edge
Radial Displacement effects, cut the image and distortions. Control the centre of the effect so the warp can be turned to great effect around a particular point of interest in the picture or selection.

Dim Lights
Random lighting effects across a picture.

Edgeworks
Reduces an image to its edges and then applies various effects to those lines or to the source input.

Effect Mesh
Splits the image up into fine or variant lines and applies certain effects such as negative image or emboss to the lines or the gaps between the lines to create some really incredible jarring imagery.

Emboss Pic
A stack of emboss effects.

Framing
A vast range of framing possibilities, either around a picture as a picture frame or around a selection to highlight a certain part of the image

Inverse Time
Inverse/Negative effects . Rim effects and other awesome colour effects.

Lift Off
A slightly more complex variant of Emboss Pic. A massive range of options, even odd effects such as emboss within an emboss.

Op Cut
Instead of the opArt effects overlaying a picture totally, the opArt effects control various line effects/blinds to overlay the current image, and these lines are filled with gradient colour settings. You can control the interval of lines and the thickness and using the supplied variant settings you can create way more than a simple vertical set of lines.

opArt
Generate some incredible opArt imagery. A huge range of options, radial and horizontal/vertical opArt.

Poster Paints
Posterisation effects.

Randomiser
Randomisation effects.

Reflections
Stacks of different mirror-like effects, so you can reflect one side and then change the way the 'reflection' behaves.

Shift Mesh
Shift source and result using various line interval/gap effect settings.

You can also control the shift across the colour channels. Also you can apply variant line types.

Shudder
Camera shudder effects and incredible blurs. Apply the effect in varying manners over the colour channels; control the repeats of the images; apply different effects in the context of the blur. Mix the image with the blur effect. Mesh blur effects and more.

Silver Lining
Lines drawn across the picture, vertically, horizontally and more, you can control the interval, and how it interacts with the source image. Also contains some excellent threshold/line effects.

Sliced Turn
Rotate an image or twirl but as you do it, the image is sliced into the swirled image or not.

Teethmarks
Stacks and stacks of sharp edged displacement as well as image/result displacement effect settings.

Wavelength
Draws waves on an image, you can control various aspects of the wavelength, the colour of the lines with options for gradient waves and controlling how much of the picture is covered with waves.

Wavy City
Wavy Displacements. Distort an image using various wavy displacement settings. Control how the output image is placed within the wavy lines so you could have one part of image in waves up the correct way and the rest of the image up side down, creating a pretty wonderful stand out image.

Wavy
More and more wavy displacement effects intermingled with a huge number of options and additional settings and possibilities.

Innovations 1.5.1 System Requirements

Windows
Photoshop® 5+
Microsoft Windows 95, Windows 98, Windows NT4.0.
Pentium 200 MHz (or compatible)
32MB RAM or greater allocated to host (64MB + recommended)
6MB free hard disk space or greater.
Colour display.
24-bit colour video.

Photoshop® and Adobe® are registered trademarks of Adobe Systems Incorporated.

Sapphire Innovations Ltd. was formed in 1998.
