

Innovations 2 (version 1)

A new powerful set of plugins for Adobe® Photoshop®, for PC.

12 incredible plugins.

Blacken

Threshold tool. The plugin comes with options to control the output threshold, randomised, additional effect overlays, output image effects such as mosaic variants.

Blurred Ways

Blurrrrrring tool. Odd blur effects and image mixing, control of the direction of the blur as well as applying the blur with emboss/threshold etc. variants as well as additional x and y blur variations. The blur can be modified in either channel to create some really beautiful blurring and colourful output.

Bright Days

Smearing effects along with control of the image's brightness. Again, the smearing/brightness effects can be controlled in separate RGB channels and the various options of smearing direction and effect enhancement can be applied. Creates wonderful subtle colouring of images.

Colour Op

Basic opart dots but with colour channel variants to create some intense colourful and dotty images as well as mixing in dot directional effects and the underlying image.

Dark Times

Intense darkening of the image as well as controlling the 'darkening' colour shifts there are mixing options, colour level thresholds, and more.

Rotator

Twirl or twist an image. This effect can twirl an image in just the red channel or all, along with additional drag and pull effects; also comes with a wide range of 'jarring' or displacement options so the image can be end up looking through smooth glass or 100s of shards of rotated glass.

Solar Fire

Solarisation-like effects. Creates some wonderful colour images or grey scale images.

Split Blur

Blurring function but the blur is split as a reflection, vertically and horizontally. Again, with options to vary the effect in different channels.

Strip Blur

Blur effect but alternate blur directions in strips. Creates some amazing blurring imagery. Again, variant channel effects and directions of blurs and options to apply a 'mosaic' like blur as well as variant output modes.

Strips

Image is cut into strips and re-output in different directions. The slicing factor can be controlled along with a number of colourful options.

Thresholds

Threshold tool but with a smear effect built in. The plugin comes with options to control the output threshold, additional effect overlays, output image effects such as mosaic variants.

Waved

Wavy output, controlled by the interrelationship between two sets of wave conditions.
