

## Innovations 3

A new powerful set of plugins for Adobe® Photoshop®, for PC.

14 incredible plugins. All these plugins are packed with 100s of possible settings and options, from the basic effect to the weird or subtle.

This set of plugins are grouped as a set of colour channel effects, though intermixed with additional options.

Though the only application that is supported is Photoshop, the plugins work with numerous other applications and these plugins will bring an easy to use but plugin-effect packed set of additional colour manipulation options to add to your creative arsenal.

### Blue Greyscale

Greyscale effects but applied via the blue channel

### Framer

Vignette plugin

### Grainy Reverse

Negative effects mixed with a grainy output

### Green Greyscale

Greyscale effects but applied via the green channel

### Grey Shake

Greyscale shaking plugin.

### Greyscale

Stacks of different types of grey. Dull... no way.

### Negativity

Inverse effects

### Percent Add

Add in a percentage of the current colour

### Phased Out

Solarisation oddball effects

### Red Greyscale

Greyscale effects but applied via the red channel, packed with stacks of greyscale options.

### Reverse Blur

Inverse/negative mixed in with a little camera shake/blur.

### Reversed

Simple to use negative effect, but still packed with options.

### Shake Mix

Mix in some shake, mix in some colour, and output a great image.

### Solarville

Solarisation like effects.
