# NTI Sets Launch Date For MiniSPL – Extension Of Minstruments Family

**Schaan (LI), 7, February 2001 – NTI's Sound Pressure Level tool MiniSPL extends the range of functionalities of the Minilyzer. A Minilyzer ML1 operating with the MiniSPL develops acoustical measurements. The MiniSPL sets a new benchmark in cost effectiveness for SPL devices. Launch date is March 7.**

With the MiniSPL the broad range of analysis functions of the Minilyzer ML1 are extended by a comprehensive set of functions for acoustical analysis. The MiniSPL will be launched by NTI on March 7 on the occasion of the Musikmesse / Pro Light & Sound in Frankfurt (Germany).

The omni directional MiniSPL is in accordance with ANSI S1.11 Type II. A Minilyzer / MiniSPL system allows SPL and Integrated Level Equivalent (LEq) with standard frequency weighting filters (A and C) and time response modes (fast, slow and impuls). As well the system allows selectable integration intervals with start, pause and stop. The SPL signal from the MiniSPL can be displayd with the Minilyzer 1/3 oct. spectrum analyser.

All MiniSPL's leaving NTI's production line are calibrated. To suit highest demands and odd environmental conditions the MiniSPL / Minilyzer test system offers a custom calibration function which allows users to calibrate the MiniSPL / Minilyzer with with the preferred calibration tool.

With its internal power supply the MiniSPL can be connected to any audio input device without phantom power supply or preamps.

All new Minilyzers are being distributed with the new software version 2.0 enabling it to operate smoothly together with MiniSPL. Purchaser of the MiniSPL using a Minilyzer with a 1.x software version are entiteld to obtain a free copy of the new SW 2.0.

### Note to the editor
