

## **Slope:** Hills and Valleys

Use these mounds and holes to further refine your terrain. Select and drag in what you need.

Customize your lot further by:

- Circular, rounded;
- Shapeable, compound;
- Shapeable, flat-topped.

Choose a mound or hole, then choose a **Draw Type**.

**Note:** Use the **Free Form** shape by depressing the left-button of the mouse while drawing until the shape is finished. The rough-drawn line is instantly converted into curves.
