

Gardens: Bed Shaping

Create pre-formed beds to add to your design.

- Choose a shape from the **Object toolbar**.
- Drop it into the Top View window.
- Click the **Zoom in** tool to see things up close (above the Top View window) then click and drag a box around the areas you want to magnify.
- Click **Zoom out** to get back to normal view.

Note: Use the **Free Form** tool, in Draw Type, to create custom garden shapes. Just click the bed with the little pen next to it, choose the Free Form tool, and draw it with your left mouse button held down.
