

House: Adding Blocks

Use the blocks *below*, on the **Object Toolbar**, to add more rooms or a garage to your home.

- Select a block from the toolbar and drag it into the work area.
- Rotate the block by dragging its round handle or resize it by dragging its triangular handles.
- Double-click the block to change wall height. When its **Spec Sheet** opens, type a new height.
- Raise the block above the ground by changing the **Height Above Ground** measurement in the Spec Sheet.
- Click the **Mini View** tab at the top of this window to preview the results.
