Shopping List

The Shopping List keeps track of the items that you'll need to purchase for your design, as well as their quantities, unit prices, and subtotals.

To add an item to your Shopping List:
• Open its Spec sheet
• Check Add to Shopping List.
• Expand and contract each category to see or hide items in the list by clicking a category name.

Note: Default prices are based on national averages and may not match your local prices. You can easily insert your local prices. Also, look for prices at Garden.com and other Internet gardening sites.
