

«DATA MergeText»

^-- After DATA is the name of your address list. If you have change the file name in ADDRESS MERGE then change it in there too.

«Name»

«Address1»

«Address2»

«Address3»

«Address4»

Dear «Name»

Is this still your phone number ? «Phone1» If so, I'll like to call you to talk to you, «**Name**» about this great hyper card stack I just found called ADDRESS MERGE STACK. It's by those increadable people MICRO MANIAXS and their newest creation is really useful.

I'm told that they have a more comprehensive one in the works for only \$10, but being my friend they'll also included the SPY STACK DEMO as an added bonus.

Write to MICRO MANAIXS
