
2. Registration, Support And Upgrades

ICS is currently available for free from AmiNet Internet sites. You can use it as long as you fill out and return the register form shipped with ICS within 48 hours after installation. Again, ICS is free. All you have to do is register!

Note that this version of ICS will only work until the expiring date shown in the About requester of ICSPrefs. Afterwoods you have to update ICS in order to get the latest version. This also gives me a better idea of how many Amiga users are still out there. There will be warning requesters before the software expires.

Wolf Faust treats the support of his products very seriously. He continually improves his products and from time to time makes these improvements available in the form of product upgrades.

Wolf Faust provides technical support via Internet (wfaust@stud.uni-frankfurt.de).

Wolf Faust can be reached at the address below. If you are making a bug report, do not forget to include your phone number. And make sure you have first gone through the problems discussed in this manual. Also don't forget to include all information/files allowing me to repeat your problem on my machine.
