

# wlInformant<sup>TM</sup>

## **Welcome:**

Congratulations on your decision to evaluate wlInformant. wlInformant is an advanced utility package and expert system for Windows. You don't have to be an expert to be able to use wlInformant effectively because wlInformant is the expert. It's designed to be easy to use, yet powerful. wlInformant takes the drudgery out of many everyday Windows housekeeping tasks, such as eliminating redundant .DLL and .VBX files. Beginners and experienced users alike will benefit from the many capabilities of wlInformant.

## **How to load wlInformant at startup:**

To get wlInformant to run automatically when you run Windows, all you have to do is put a copy of the wlInformant icon in your Windows 3.1 "StartUp" group. To do this, drag the wlInformant icon from its installed group to the StartUp group (while holding the Ctrl key).

# What's New?

## **Revision History:**

Version 1.10 - 05/94

- Uninstall is enhanced to find dynamic link libraries (DLL's)
- Uninstall is enhanced with "Browse" capability. This allows wlInformant's Uninstall feature to work with third-party shell replacements, such as Norton Desktop<sup>TM</sup>. Browse can even be used to remove DOS programs.
- Eject button disable. A new eject button toggle has been added to the *View* menu. It is a good idea to use this feature when configuring wlInformant for an inexperienced user, or if you are concerned about accidentally hitting *Eject* yourself.
- Corrected problem with the minimize icon.
- Minor refinements to the user interface

Version 1.00 - 03/94
