# Level of Difficulty

There are three levels of difficulty in **ANIMAL BITS**. They are easy, medium, and hard. The difference in difficulty is determined by the number of puzzle pieces in each puzzle. To change the level of difficulty, press one of the three buttons. When a button is pressed, it turns to green to show that it is the active button. The default level for the puzzle is easy.

[Medium Button](#)

# Peeking

By pressing the peek button you can see the puzzle in its completed form. The peek window has a close button which will close the peek window when you are done peeking.

# Changing the puzzle

In order to change the puzzle you are working on, press the change button. A randomly selected puzzle is generated. The pieces are also placed randomly, so that it is rare to see the same puzzle more than once. pressing the change button while you are working on a puzzle will reset your score.

# Close

To end the game, press the close button on the puzzle window.

# Top Ten List

The top ten list automatically shows up at the end of each puzzle. If your score is less than any of the top ten scores, then you will be able to enter your name into the list of top ten scores. Once you have entered your name, it will appear the next time the list shows. Press the 'Accept / Close' button to close the list

# Ordering the expanded program

## The product.

This shareware package contains puzzles of 3 animals. The expanded program contains puzzles of 30 animals. By using 30 different puzzles, and randomly placing the locations of the puzzle pieces, you will have an almost infinite number of puzzles to enjoy. The expanded program is distributed on approximately eight three and a half inch high density floppies.

You agree to be bound by this agreement and it's terms. You also agree that this agreement is complete and exclusive statement of the agreement between us, and it supersedes any proposal or prior agreement, oral or written, and any other communications between us.

# Progress

Progress during a puzzle can be seen in two places other than the puzzle itself. A gauge on the right of the puzzle keeps track, moving up each time a correct tile is placed, and down each time an incorrect tile is placed. There is also a completed tiles value at the bottom. Next to the completed tiles value is the number of tries that you have taken so far.
