

## **WBRIDGE BETA TEST VERSION 2.1 - RELEASE NOTES**

1. Backwards compatibility to Beta Release 2 should exist. Save files created prior to Beta Release 2 will not load properly.
2. The minimum configuration to run this version should be:
  - 2M Memory.
  - 1.4M disc space.
  - Microsoft Windows 3.1.
3. The program has not been tested on the minimum configuration so if you have problems please report.
4. Report all problems (eg bugs or bad play) to the author:
  - Gerald Wilson [100046,670].
6. Please complete and E-Mail a betareg.txt form to register as a beta tester, if you have not already done so. Use betabug.txt to report problems.
7. The program and its associated files are not to be distributed without the permission of the author.
8. No liability is accepted for any damage or loss resulting from the use of this program.

### **TO THE BETA TEST TEAM**

This is planned to be the final beta version of WinBridge, but plans have been known to change.

New features include:

Take back trick: this lets you replay a trick but is only available from the lead until the winning card is shown.

Window size is now remembered so you can set the size to suit your display and the game will restart at the same size.

The bidding buttons have been reduced in size so that VGA users don't have to stand on their heads to read their hand.

The played cards no longer leave a piece of the bairse on the displayed hands.

The help file now describes the possible opening leads.

Rubber bidding will take account of part scores. (The previous version was supposed to but there was a bug that no-one noticed.)

Duplicate score is now enabled. I'm really not sure why I disabled it.

There is no context sensitive help, but I am thinking of how this might be achieved.

As always, all comments (cruel and kind) and any bugs or bad bidding/play should be reported, with a copy of the save file if appropriate.

If you just found the file in the library and would like a full version of the game when it is available

(it will bid and play better and have all the features available), send me a message (Gerald Wilson [100046,670] via CompuServe E-Mail) and I will reserve a copy at half price (full registration is likely to be about \$45). The current version is NOT SHAREWARE, and shall not be distributed in any form or on any media without my explicit permission.
