Description: Win Bar Clock 4.1 (tm) (Title Bar Clock) is a utility for the Windows environment that displays information such as the time, date, system resources, or any text message

> in the title bar of the active window, and/or
> in a floating (movable) "Bar Clock"

Features:
- Customize all functions
- Display the date, time, memory, and system resources in any format
- Display personal text message in the title bar of the active window
- Set an unlimited number of alarms
- Run timers with which to track sessions and online fees

- Change colors (can be up to 16 million)
- Select font type and size (TT ATM FON)
- Speed dial and phone number database (supports com ports 1 - 4)
- Edit system files (BAT, SYS, and INI files)
- Quickly access system commands *Exit* and *Restart Windows*

- Jump to DOS or reboot
- Run programs from within any application
- Display month calendar
- Configure all functions with Center Console
- Display system information -- everything you want to know
  about your hardware and operating software setup, including:
        free and used disk space on any drive...
        clusters, sectors, bytes...

video mode, processor, display driver, keyboard...
Windows & DOS version, language...
time length of your current Windows session...
and much more...

System Requirements: Windows 3.1
VBRUN300.DLL in directory C:\WINDOWS\SYSTEM
You can download it from most online services.

Installation:

(1) Create a directory (C:\ WINDOWS\WBARCLK) and copy these files into it:
> WBCHELP.WRI   This file
> WBARCLK.EXE   Win Bar Clock executable
> WCSETUP.EXE   Win Bar Clock Setup file
> **README.WRI**   **Information File (Please read it)**
>ALARM.WAV   Wave file for the alarm you may replace it with your own.
> LICENSE.WRI   License information

*NOTE: <u>do not delete</u> WCSETUP.EXE. This is a Win Bar Clock 4.1 (tm) system program.
If you delete it, the program will not run.*

(2) Move **DISKINFO.DLL & VBCTL3D.VBX** into the WINDOWS\SYSTEM directory.

(3) To automatically run Win Bar Clock 4.1 (tm) when you start Windows, set up an icon for WBARCLK.EXE in your StartUp program group. Restart Windows.

If it is installed properly, the Clock Bar will appear in the middle of your screen.

Main Menu:
To access the main menu, click once on the
floating Clock Bar with the **right mouse button**.

The main menu contains   **SetUp**
several options: **System Commands**
                             System Info
                             Quick Execute
                             Speed Dialer
                             Calendar
                             About
                             Start Timer
                             Exit
