MultiCQ
Released- 11/22/98

This is the second release of MultiCQ. It may have bugs in it, if you find any, feel free to send an ICQ message to 4832025.

MultiCQ will attempt to detect what version of ICQ you have.   If you have ICQ98, or ICQ99a (build 1547 o), it will patch your files very quickly.   If you have another version of ICQ, newer or older, it can still reliably patch it.   It will search through the file until it finds the proper string to patch.   This can take a while, so be patient.

After the patch has run, find the file ICQ2.exe, it should be in your ICQ directory.   Run it, and it will open up a second copy of ICQ.   With ICQ99 sometimes it will crash the first time, just re-run it.

Thanks to ProGeN for the cool original patch - visit his website at progenic.com
