

WinZip Wizard

The WinZip® Wizard simplifies the process of creating, updating, unzipping and installing software distributed in Zip files using the standard and familiar "wizard" interface. Features include:

- Fast access to Zip files you downloaded: no need to use the Explorer to hunt for Zip files. The Wizard lists the Zip files in your "Favorite Folders" by date, with the most recent files first, so you can quickly access the files you just downloaded. The search feature can find any Zip files lost on your hard drive.
- Automatic installation of software distributed in Zip files: if a Zip file contains a "setup" or "install" program, the Wizard will unzip the files, run the installation program, and clean up any temporary files. Special Wizards make installation of desktop themes and screen savers a snap.
- Easy unzipping: just click "Unzip Now" and the Wizard will unzip your file. It will display the results in Windows Explorer, so you can start working with the new files right away.
- Simple step-by-step Wizard assistance in creating new Zip files and updating existing Zip files.
- Works hand-in-hand with Netscape Navigator/Communicator and Microsoft Internet Explorer using the Internet Browser Support Add-on, freely downloadable from the WinZip web site at <http://www.winzip.com>.

The full WinZip Classic interface is only a click away.

The best way to learn the Wizard is to use it--just click the **Next** button in the Wizard to proceed. Press the F1 key or click **Help** at any time to get help on a specific screen. Click on any of the subjects below for more information.

About Zip Files

What is a Zip file, anyhow?

Zip files are "archives" used for distributing and storing files. Zip files contain one or more files. Usually the files "archived" in a Zip are compressed to save space. Zip files make it easy to group files and make transporting and copying these files faster.

Why do people use Zip files?

Zip files save time and space, and make downloading software and transferring e-mail attachments faster. Typical uses for Zip files include:

- Most files available on web and ftp sites, services like America Online and CompuServe, and other online services are distributed as archives. Two benefits of using archives for electronic file distribution are that only one file transfer operation ("download") is required to obtain all related files, and time necessary for the file transfer is shorter, because the files in an archive are compressed into a smaller size.
- It is often useful to send a group of related files to a friend or associate. Rather than distributing individual files, it is often easier to distribute the files as an archive to benefit from the file grouping and compression.
- Some files are important but used infrequently. To save disk space, simply compress these files

into an archive when they are not used, and decompress them only when needed.

Where does WinZip® fit in?

WinZip makes it easy for Windows users to work with archives. It features an intuitive, point-and-click, drag-and-drop interface for viewing, running, extracting, adding, deleting, and testing files in archives, using a standard Windows interface. WinZip provides the same "friendly face" for many archive formats.

What is a Wizard?

A Wizard is a series of panels or pages in a special window that help you through a task. The Wizard look and feel is standardized, and is used throughout Windows and by many Windows applications. Wizards are especially useful for complex or infrequent tasks.

WinZip Wizard vs. WinZip Classic Interface

Both the WinZip® Classic and Wizard interfaces are included in all versions of WinZip. One click switches from the Wizard to the Classic interface and vice versa.

- The WinZip Wizard interface is ideal if you want to know as little about Zip files as possible or just "get started" with files you have downloaded. With the Wizard, you simply click the "Next" button a few times, and presto, your files are zipped, unzipped, and/or installed. When you want to use more advanced zipping features, you can easily switch to Classic mode.
- The award-winning WinZip Classic interface features tight integration with the Windows shell and versatile drag and drop facilities. It is great if you are comfortable using Windows and the Explorer, or want to use advanced zipping features.

[WinZip Classic Documentation](#)

Select Zip File

Select a Zip file from the list, then click Next. This list shows all the Zip files in all your [Favorite Zip Folders](#). You can sort the list by clicking on one of the column headers (for example, click on name to sort the files by name).

Click [Search](#) to automatically search for all Zip files on your hard disk or to search for a specific Zip file yourself.

Select Activity

Tell the WinZip® Wizard what you want to do. There are three choices:

Unzip or install from an existing Zip file: choose this option if you already have a Zip file and you want to extract or install files from it. If a Zip file is already open when you reach this panel, its name will be shown and, if it contains a [desktop theme](#) or a [screen saver](#), this choice will read **Install desktop theme** or **Install screen saver**.

Update an existing Zip file: choose this option if you already have a Zip file and you want to add files to it or update files that are already in it. If a Zip file is already open when you reach this panel, its name will be shown.

Create a new Zip file: choose this option if you want to create a new Zip file.

Choose Zip Name

Choose a name for your new Zip file. You can type a name in the **File name** box, or you can use the **Browse** button to explore your system.

If you don't specify a filename extension, the Wizard will automatically add .Zip. If you use the **File name** box and you don't type a folder name, the new Zip file will be stored in the folder shown above the box.

If you specify a Zip file that already exists, the Wizard will ask if you want to update the existing Zip file (it can't create a new Zip file with the same name as an existing one).

The Wizard can only create and update Zip files. To create or update other types of archives (such as LZH or ARJ), use the WinZip Classic interface.

Select Files

Use this panel to list the files and/or folders that you want to be placed in your Zip file. When you specify a folder, all files in the folder *and all of its subfolders* will be placed in your Zip file.

There are three ways to specify files and folders:

- You can drag and drop files and/or folders from Windows Explorer.
- You can click **Add files** and select one or more files from an Explorer-like window. Any files you select will be added to the list.
- You can click **Add folders** and select a folder from an Explorer-like window. Any folder you select will be added to the list.

To remove files or folders from the list, select them and click **Remove**.

You must specify at least one file or folder, otherwise the WinZip® Wizard will have nothing to do.

When you have listed all of the files and/or folders you want, click **Zip Now** to create or update your Zip file.

Favorite Zip Folders

About Favorite Zip Folders

The "Favorite Zip Folders" feature organizes Zip files into one list that is sorted by date, making it easier to locate all Zip files, regardless of where they came from or where they are stored. For example: by default, AOL downloads go into the c:\aol\download folder, while CompuServe downloads go into the c:\cserve\download folder. When you want to select a Zip file to unzip or update, the Wizard automatically shows all Zip files in all of your "Favorite Zip Folders" in one convenient list.

The first time you use the Wizard, it searches for folders that are likely to contain Zip files, and adds these folders to your Favorite Zip Folders. You can later add or remove folders from this list with the Favorite Zip Folders dialog box.

Using the Favorite Zip Folders Dialog Box

Click the **Options** button in the **Welcome to the WinZip Wizard** panel. Your current Favorite Zip Folders will be listed.

To **add** a folder to the list, click **Add a folder to list** button and select the desired folder in the folder-browsing window.

To **remove** a folder from the list, click on it in the list of Favorite Zip Folders and then click **Remove folder**.

Zip Complete

This panel appears when your Zip operation is complete. Click **Next** to work with a different Zip file or **Close** to close the WinZip® Wizard.

Click **Mail this Zip file** if you'd like to e-mail your new or updated Zip file to someone else. (This button will appear only if you have a supported e-mail program such as Outlook.)

If you'd like to add more files or folders to the same Zip file, click **Back** to return to the [Select Files](#) panel.

Unzip

Click **Unzip Now** to unzip all the files in the Zip file to the selected folder. Click **Select different folder** if you want to unzip the files to a different folder.

Normally WinZip® prompts before overwriting any files on your hard disk with the same name as files in the Zip file, but you can change this default by clicking **Overwrite matching files automatically**.

Click **Display file icons after unzipping** to automatically open an Explorer window showing the unzipped files.

Click **View Zip documentation** to see more information about this Zip file as provided by a documentation file within the Zip file. This button is present only if the Zip file contains a documentation file with a name that WinZip recognizes, such as README.TXT or FILE_ID.DIZ.

Click **View Zip comment** to display the comment contained in the Zip file. This button will be present only if the Zip file has a comment.

Install

If a Zip file contains a SETUP or INSTALL program, the WinZip® Wizard will perform these steps:

- Unzip the software to a temporary folder.
- Run the SETUP or INSTALL program.
- Delete any temporary files.

If a Zip file contains a desktop theme (but no SETUP or INSTALL), the WinZip Wizard will perform these steps:

- Allow you to select a theme (if the Zip file contains more than one).
- Extract the theme definition file to a temporary folder and analyze it to determine where the theme components should be extracted.
- Extract the theme component files.
- Run the system theme installer (usually THEMES.EXE) to complete installation.

If a Zip file contains a screen saver (but no desktop theme, SETUP, or INSTALL), the WinZip Wizard will perform these steps:

- Allow you to select a screen saver (if the Zip file contains more than one).
- Extract the screen saver to your Windows folder.
- Run the system screen saver control application to complete installation.

Related topics:

[Desktop Theme Installer](#)

[Screen Saver Installer](#)

Search

The WinZip® Wizard can help you find Zip files if you don't know exactly where they are. Select **Search hard disk(s) on this PC** to search all the hard drives on your PC (network disks and CD-ROM disks are not searched). Select **Search Favorite Zip Folders** to search for Zip files in your [Favorite Zip Folders](#). Select **Search Disk** to search a specified disk (for example, a diskette or CD-ROM). Select **Let me find it** if you want to look for the file yourself.

Options

The Options dialog makes it easy to add, remove, and update your [Favorite Zip Folders](#), specify a default unzip folder, and determine whether WinZip® starts with the Wizard or Classic Interface.

The **Misc** tab also allows you to enable or disable the desktop theme and screen saver installers and to select a WinZip 7.0-compatible Wizard. The WinZip 7.0 Wizard only unzips and installs; it cannot create new archives or update existing archives. You might want to choose this option if you only use the Wizard for unzipping and installing, never for creating or updating Zip files--it simplifies use of the Wizard slightly because you don't have to select between unzipping, updating, and creating.

Select Folder

There are three ways to select a folder:

- Click on a folder in the **Folders and disk drives** Explorer-style tree
- Select from the **Select Folder** drop-down combo box
- Click **New...** and type the name of a new folder.

Error Zipping Files

One or more errors have occurred while zipping the files or folders you requested.

Click **View report** to display the report that WinZip prepared during the zipping process. The report shows all files successfully zipped and contains information about any errors that occurred. Using the information from the report, you may be able to correct the condition that caused the error. For example, if the report indicates that a file could not be opened, it is possible that the file is already in use by another application. To correct the error, close the other application or close the file within the application.

After viewing the report, decide whether or not you want to try again.

If you want to try again

Click **Back** to return to the Select Files panel. Then correct the cause of the error or select different files and click **Zip Now** to repeat the zipping process.

If you do not want to try again

Click **Next** to work with a different Zip file or **Close** to close WinZip.

Drag and Drop

You can use Windows drag and drop in the WinZip® Wizard in two ways:

- You can specify a Zip file to work with by dragging it from Windows Explorer and dropping it on most WinZip Wizard panels. When you do this, the Wizard will take you to the Select Activity panel (or to the Select Zip File panel if you are using the WinZip 7.0-compatible Wizard).
- When using the Wizard to create or update a Zip file, you can drop files and folders from Windows Explorer on the Select Files panel. The Wizard will add these files and folders to the Zip.

Advanced Zip Operations

This WinZip® Classic interface is almost as easy to use as the Wizard but offers greater power and flexibility. Online tutorials are available to help you learn how to use it. You might want to begin with the Classic interface step-by-step tutorial [Creating New Archives](#) to teach you to how to create new Zip files using the Classic interface.

The same tutorial includes an [Adding Files to an Archive](#) topic to explain that operation.

If you are unfamiliar with the Classic interface, we suggest you begin at the start of the [Classic Interface Tutorial](#).

To access the WinZip Classic interface from the Wizard, simply click the **WinZip Classic** button.

Using WinZip to E-mail Zip Files

WinZip® includes two features that make it easy to e-mail compressed files to others via the Internet:

- The Zip and E-Mail feature compresses files and folders from My Computer or Windows Explorer into a temporary Zip file, creates an e-mail message, and attaches the Zip file to the message. You can then address the message, add any desired text, and send the e-mail as you usually would. WinZip automatically deletes the temporary Zip file when it is no longer needed.
To use the feature, simply select the desired files or folders in My Computer or Explorer, click the right mouse button, and choose **Zip and E-Mail** from the popup menu.
- After you use the Wizard to create or update a Zip file, you will see a button labeled **Mail this Zip file**. Simply click this button; WinZip will create a new e-mail message and attach the Zip file to it. You can then address the message, add any desired text, and send the e-mail as you usually would.

Like the Windows "Send To Mail Recipient" feature, these WinZip e-mail features use a protocol called *Simple MAPI* to "talk" to your e-mail program. MAPI, which is provided by your e-mail software and not by Windows itself, allows Windows and application programs to instruct your e-mail program to create new mail messages, add attachments, etc. WinZip's e-mail features require that you have a *MAPI-compliant* e-mail program installed and correctly configured (just as the Windows Send to Mail Recipient feature does).

Examples of MAPI-compliant e-mail programs are Outlook, Outlook Express, and Eudora.

However, neither AOL 4.0 nor AOL 5.0 supports Simple MAPI. Therefore, neither Windows' Send To Mail Recipient nor WinZip's e-mail features can be used with AOL 4.0 or 5.0.

Compressing attachments from within your e-mail program

There is another technique you can use to compress attachments while composing messages in your e-mail program. This technique does not require that your e-mail program support the MAPI interface that WinZip uses for the above features; it works with most e-mail programs that use the standard Windows "Open File" dialog box to attach files. Here is the technique:

1. In your e-mail program, open the dialog box you normally use to attach files to your e-mail messages.
2. Using the standard Open File dialog box, locate the file or folder you wish to attach.
3. Position the mouse pointer over the file or folder name in the dialog box, then click the **right** mouse button and choose **Add to filename.zip** from the pop-up menu (note: the filename shown in the menu entry will be the name of the file you selected). This will create a Zip file called "filename.zip".
4. Still in the Open File dialog box, click once on filename.zip (the zip created in the previous step). This file will normally be at the end of the current directory listing.
5. Click the appropriate button to attach the Zip file (this is typically labeled Open, Attach, or Insert).

Note: this technique has been tested with current versions of the most popular e-mail programs (such as Outlook and Eudora). We can't promise that it will work with all e-mail programs or with future versions of the programs we have tested.

Frequently Asked Questions

Click the buttons below to see the answers to our most frequently asked questions. You might also want to [check our web site for additional FAQs](#).

Technical questions

[How do I compress a folder and later restore it?](#)

[How do I use disk spanning?](#)

[How do I use WinZip to process AOL e-mail attachments?](#)

[How do I use WinZip to e-mail Zip files?](#)

[Why aren't WinZip's e-mail features working for me?](#)

Non-technical questions

[How do I order?](#)

[Do you keep track of address changes?](#)

How do I compress a folder and later restore it?

How to compress a folder and its subfolders:

1. Start WinZip® and click **Next** in the Welcome panel.
2. In the Select Activity panel, choose **Create a new Zip file** and click **Next**.
3. Type the name of the archive, e.g.,
C:\MYDIR.ZIP
and click **Next**.
4. From Windows Explorer, drag the folder you wish to compress and drop it on the Select Files panel, or click **Add folders**, select the desired folder, and click **OK** to add it to the list.
5. Click **Zip Now**.

How to restore a folder and its subfolders:

1. Start WinZip and click **Next** in the Welcome panel.
2. In the Select Activity panel, choose **Unzip or install from an existing Zip file** and click **Next**.
3. Select the Zip file created above; if the Zip file does not appear in the list of files, click **Search** to find it. Then click **Next**.
4. In the Unzip panel, use **Select different folder** to choose the folder where you would like to restore the compressed folders and its subfolders, then click **Unzip Now**.

How do I use disk spanning?

WinZip® makes it easy to create Zip files that "span" multiple disks. This is useful if the files you want to compress will not fit on one disk.

To make a Zip file that spans multiple disks, just create a Zip file on a removable disk, and add files and folders to the Zip file as you normally would. If the disk fills during the operation, WinZip will prompt you to insert another disk. Simply insert the next disk and click the **OK** button.

Example: to zip the files in your C:\DATA folder to a Zip file called A:\DATA.ZIP:

1. Start WinZip; click **Next** in the Welcome panel.
2. Choose **Create a new Zip file** and click **Next**.
3. Type the name of the Zip file you want to create (A:\DATA.ZIP) and click **Next** (be sure to have a disk in drive A).
4. Drag and drop C:\DATA from Windows Explorer to the Select Files panel, or click **Add folders**, select C:\DATA, and click **OK**.
5. Click the **Zip Now** button to create your Zip file. If more than one disk is needed, WinZip will prompt you for additional disks. Simply insert a new disk and click the **OK** button.

Important: disk spanning is available only when creating a new Zip file, not when adding files to an existing Zip file. You cannot add files to or remove files from a Zip file that spans disks. WinZip requires pre-formatted disks (you can format disks using My Computer or Windows Explorer).

Do you keep track of address changes?

Yes, we track address changes so that we can send you upgrade notifications. **If you purchased a copy of WinZip® and have moved, please send us the following information:**

1. Your name (If you are not sure how you spelled your name when you registered, please include common alternate spellings, e.g. "J. E. Smith", "Jim Smith", etc).
2. Your e-mail address, if any (please double check it! almost 10% of the people that sign up for our mailing list type an invalid address; e-mail addresses are notoriously difficult to spell correctly).
3. Your new postal mailing address.
4. Your old postal mailing address.
5. Approximate purchase date.
6. Important: please indicate how you purchased WinZip:
 - Online order placed through the WinZip web site
 - By check
 - By telephone order to PsL (Public Software Library) or DigiBuy
 - Reseller (please include reseller name)

Thank you!

How do I use WinZip to process AOL e-mail attachments?

You can use WinZip® to decode certain e-mail attachments (known as "MIME-encoded") that are not handled by AOL e-mail services.

When you install WinZip using the standard installation options, the installation procedure automatically associates WinZip with MIME-encoded files. This allows you to open a MIME-encoded file with WinZip simply by double clicking it in Windows Explorer, just as you would open a Zip file.

Here is a quick example of how to decode files that are encoded within the MIME file:

1. Find the MIME file in Windows Explorer (it will typically be in your AOL downloads folder). Open the file by double clicking its name; this will start WinZip. Click **Next** in the Welcome panel.
2. Click **Next** again in the Select Activity panel.
3. In the Unzip panel, use **Select different folder** to browse to the folder where you want the decoded file(s) to be stored, then click **Unzip Now**. This will decode the file(s) encoded in the MIME file and place them in the folder you specified. If you checked the option to **Display file icons after unzipping**, WinZip will automatically open the folder containing the decoded files. Just double click each file to view its contents.

For more information on downloading e-mail attachments from AOL, look in AOL's Help area.

WinZip 8.0 Ordering Information

This ordering information applies to the English language version of WinZip® 8.0. All disk orders are sent by postal mail (airmail outside North America) and leave our office within two business days after they are received; there is no additional charge for postage.

All orders are subject to the WinZip [License Agreement](#).

Immediate Online Delivery

Immediate online delivery of registered copies of WinZip is available for credit card orders placed via the Internet using the Order link at the WinZip web site:

<http://www.winzip.com>

You can place orders for delivery by postal mail (or airmail outside North America) using the Internet order forms or as described below.

Ordering by Check

To order by check, send a completed order form and a check payable to WinZip Computing, Inc., P.O. Box 540, Mansfield, CT 06268 USA. Payments must be in US dollars drawn on a US bank, or you can send international postal money orders in US dollars. Click here to view a ready-to-print [Order Form](#).

Credit Card Orders

You can place secure credit card orders on the Internet using the Order link on the WinZip web site:

<http://www.winzip.com>

For information on credit card ordering by phone, fax, or postal mail, see [Credit Card Ordering](#).

Purchase Orders

For information on using purchase orders see [Purchase Orders](#).

Additional Ordering Options Outside the USA and Canada

For information on local registration see [Ordering Options Outside the USA and Canada](#).

Site licenses

A site license for WinZip entitles an organization to receive one copy of the distribution package and duplicate the software as necessary for use within the organization on the specified number of computers. See the table below for site license pricing. For higher quantity pricing, please send e-mail to sitesales@winzip.com or fax a request to WinZip Computing at 1-860-429-3542.

Pricing

WinZip Single Copy	\$29 each
--------------------	-----------

WinZip Site Licenses (includes distribution disk):

2 to 9 computers:	\$22 each
10 to 24 computers:	\$17 each
25 to 49 computers:	\$14 each
50 to 99 computers:	\$10 each
100 to 199 computers:	\$7 each
200 to 499 computers:	\$6 each
500 to 999 computers:	\$4 each

Prices guaranteed through July 2001.

WinZip Standard License

WinZip® Copyright © 1991-2000 by WinZip Computing, Inc.
All rights reserved.

This license applies to the standard-licensed version of WinZip. If you have an evaluation version of WinZip, see the section titled [WinZip Evaluation License](#).

WinZip License **WinZip Computing, Inc.**

You should carefully read the following terms and conditions before using this software. Unless you have a different license agreement signed by WinZip Computing, Inc. ("WCI") your use, distribution, or installation of this copy of WinZip indicates your acceptance of this License.

If you do not agree to any of the terms of this License, then do not install, distribute or use this copy of WinZip. If you paid WCI or an authorized WCI distributor for this copy individually, you may return it unused, within thirty (30) days after purchase, for a full refund of your payment.

This copy of WinZip may either be used by a single person who uses the software personally on one or more computers, or installed on a single workstation used nonsimultaneously by multiple people, but not both. This is not a concurrent use license.

You may access this copy through a network, provided that you have obtained an individual WinZip license for each workstation that will access WinZip through the network. For instance, if 8 different workstations will access WinZip on the network, each workstation must have its own WinZip license, regardless of whether they use WinZip at different times or concurrently.

This copy includes WinZip Self-Extractor Personal Edition, which may be used to create an unlimited number of freely distributable, royalty-free self-extracting Zip files. These self-extracting Zip files contain, among other things, a portion of WinZip Self-Extractor Personal Edition, including copyrighted software, proprietary notices, and identifying information (the "Extraction Software"). You may not alter or modify the Extraction Software, nor give anyone permission to do so.

This software, and all accompanying files, data and materials, are distributed "AS IS" and with no warranties of any kind, whether express or implied. In particular, there is no warranty for the optional virus scanning feature. (WinZip does not scan for viruses, it simply runs external programs that claim to perform this function.) Good data processing procedure dictates that any program be thoroughly tested with non-critical data before relying on it. The user must assume the entire risk of using the program.

This disclaimer of warranty constitutes an essential part of the agreement.

Any liability of WCI will be limited exclusively to refund of purchase price. In addition, in no event shall WCI, or its principals, shareholders, officers, employees, affiliates, contractors, subsidiaries, or parent organizations, be liable for any incidental, consequential, or punitive damages whatsoever relating to the use of WinZip, or your relationship with WCI.

In addition, in no event does WCI authorize you to use WinZip in applications or systems where WinZip's failure to perform can reasonably be expected to result in a significant physical injury, or in loss of life. Any such use by you is entirely at your own risk, and you agree to hold WCI harmless from any claims or losses relating to such unauthorized use.

This Agreement is the complete statement of the Agreement between the parties on the subject matter, and merges and supersedes all other or prior understandings, purchase orders, agreements and arrangements. This Agreement shall be governed by the laws of the State of Connecticut. Exclusive jurisdiction and venue for all matters relating to this Agreement shall be in courts and fora located in the State of Connecticut, and you consent to such jurisdiction and venue.

All rights of any kind in WinZip which are not expressly granted in this License are entirely and exclusively reserved to and by WCI. You may not rent, lease, modify, translate, reverse engineer, decompile,

disassemble or create derivative works based on WinZip. You may not make access to WinZip available to others in connection with a service bureau, application service provider, or similar business, or use WinZip in a business to provide file compression, decompression, or conversion services to others. There are no third party beneficiaries of any promises, obligations or representations made by WCI herein.

WinZip Evaluation License

WinZip® Copyright © 1991-2000 by WinZip Computing, Inc.
All rights reserved.

This license applies to the evaluation version of WinZip. If you do not have an evaluation version of WinZip, see the section titled [WinZip Standard License](#).

WinZip License Evaluation Version WinZip Computing, Inc.

By using, copying, transmitting, distributing or installing WinZip, you agree to all of the terms of this License. If you do not agree to any of the terms of this License, then do not use, copy, transmit, distribute, or install WinZip.

This is not free software. Subject to the terms below, you are hereby licensed by WinZip Computing, Inc. ("WCI") to use this software for evaluation purposes without charge for a period of 21 days. If you use this software after the 21 day evaluation period a registration fee of \$29 is required. Payments must be in US dollars drawn on a US bank, and should be sent to WinZip Computing, Inc., P.O. Box 540, Mansfield, CT 06268, USA. See the WinZip web site at <http://www.winzip.com> for information about online ordering and quantity discounts.

Unregistered use of WinZip or WinZip Self-Extractor Personal Edition after the 21-day evaluation period is in violation of U.S. and international copyright laws.

You may, without making any payment to WCI:

- a) give exact copies of this evaluation version of WinZip personally to anyone, except for the purpose of extending their 21 day evaluation period;
- b) distribute exact copies of this evaluation version of WinZip, if done exclusively through electronic channels; and
- c) make as many exact copies of this evaluation version of WinZip as you wish, for purposes of distribution as described in (a) and (b) above.

You are specifically prohibited from charging, or requesting donations, for any copies, however made, and from distributing such copies with other products of any kind, commercial or otherwise, without prior written permission from WCI. WCI reserves the right to revoke the above distribution rights at any time, for any or no reason.

Self-extracting Zip files created by WinZip Self-Extractor Personal Edition (distributed as part of the WinZip evaluation package) contain, among other things, a portion of WinZip Self-Extractor, including copyrighted software, proprietary notices, and identifying information (the "Extraction Software"). You may not alter or modify the Extraction Software, nor give anyone permission to do so. ***Under no circumstances are you licensed to distribute self-extracting Zip files created by the evaluation version of WinZip Self-Extractor Personal Edition.***

This software, and all accompanying files, data and materials, are distributed "AS IS" and with no warranties of any kind, whether express or implied. In particular, there is no warranty for the optional virus scanning feature. (WinZip does not scan for viruses, it simply runs external programs that claim to perform this function.) Good data processing procedure dictates that any program be thoroughly tested with non-critical data before relying on it. The user must assume the entire risk of using the program. ***This disclaimer of warranty constitutes an essential part of the agreement. In no event shall WCI, or its principals, shareholders, officers, employees, affiliates, contractors, subsidiaries, or parent organizations, be liable for any incidental, consequential, or punitive damages whatsoever relating to the use of WinZip, or your relationship with WCI.***

In addition, in no event does WCI authorize you to use WinZip in applications or systems where

WinZip's failure to perform can reasonably be expected to result in a significant physical injury, or in loss of life. Any such use by you is entirely at your own risk, and you agree to hold WCI harmless from any claims or losses relating to such unauthorized use.

This Agreement is the complete statement of the Agreement between the parties on the subject matter, and merges and supersedes all other or prior understandings, purchase orders, agreements and arrangements. This Agreement shall be governed by the laws of the State of Connecticut. Exclusive jurisdiction and venue for all matters relating to this Agreement shall be in courts and fora located in the State of Connecticut, and you consent to such jurisdiction and venue.

All rights of any kind in WinZip which are not expressly granted in this License are entirely and exclusively reserved to and by WCI. You may not rent, lease, modify, translate, reverse engineer, decompile, disassemble or create derivative works based on WinZip. You may not make access to WinZip available to others in connection with a service bureau, application service provider, or similar business, or use WinZip in a business to provide file compression, decompression, or conversion services to others. Purchase Orders

Purchase orders (net 30 days) are accepted from government and accredited educational institutions and major corporations, provided that they are submitted on purchase order forms with a purchase order number. Please be sure to include the standard WinZip® [order form](#) with your purchase order, and send it to WinZip Computing, P.O. Box 540, Mansfield, CT 06268 USA, or fax it to 1-860-429-3542.

Ordering Options Outside the USA and Canada

In addition to the aforementioned registration options you can contact the following distributors for local registration and support. Dealer prices may vary.

German Version: For a German language version of WinZip®, please contact H.C. Top Systems, B.V., Postfach 13 30, D-47630 Straelen, Germany, phone: 08000-946-947 (toll free; Germany only) or +31-(0)-77-306-8100, fax: +31-(0)-77-306-8130, [visit their website](#) or send e-mail to support@winzip.de.

French Version: For a French language version of WinZip, please contact AB Soft, Park Burospace #14, 91572 Bievres Cedex, France, phone: +33-(0)-1-69-33-7000.

Japanese Users: For a version of WinZip that includes a Japanese Help file, contact P. & A. Inc., No.3 Hoko Bldg. 6F, 2-29-13 Akebono, Tachikawa, Tokyo 190-0012 Japan, phone: +81-(0)-042-525-9501, fax: +81-(0)-042-525-9502, e-mail: sales@panda.co.jp or PAF02461 on NiftyServe. P&A also maintains websites in [Japan](#) and the [USA](#).

If you purchase WinZip directly from WinZip Computing, Inc., be sure to contact WinZip Computing for support, not your local reseller.

Support and Questions

To check whether you have the most recent version of WinZip®, please check the WinZip home page at <http://www.winzip.com>.

Technical support is available at no charge as described below. The best way to report problems is with the support forms available from the "Support" link on the WinZip home page (<http://www.winzip.com>). You can also send e-mail to help@winzip.com or postal mail to WinZip Computing, Inc., P.O. Box 540, Mansfield CT 06268.

When reporting problems, please include the following information:

1. Is the problem reproducible? If so, how?
2. What version of Windows are you running (Windows 95, Windows NT 4.0, etc.)?
3. What version of WinZip are you running (to see what version of WinZip you have, click the **About** button in the first WinZip Wizard panel)? Please include the entire "version" line in your problem report.
4. If a dialog box with an error message was displayed, please include the **full text** of the dialog box, including the text in the title bar.

Note: You can press F1 at any time while WinZip is active for context sensitive help.

Downloading and Processing Files with WinZip

WinZip® has special features that make it simple and convenient to download and process compressed files from the Internet and online services like America Online and CompuServe.

Click to choose the method about which you would like to learn more:

[Downloading From The Internet](#)

[Downloading From America Online, CompuServe, and Other Online Services](#)

Downloading from the Internet

You can use WinZip® to work with archives you download from the Internet just as you do with other archives, or you can use the free [Internet Browser Support Add-On](#) to simplify your work with Internet downloads, as described below.

The free WinZip Internet Browser Support Add-On will automate much of the work normally associated with downloading compressed files from the Internet. When you click on an archive using Netscape Navigator/Communicator or Microsoft Internet Explorer, WinZip will take over when the download is completed. WinZip automatically moves the downloaded file to your download folder (initially set to c:\download) and then opens the file. This add-on is available for download from the web page <http://www.winzip.com/ibrowser.cgi> (this free add-on is not part of the WinZip distribution package).

If you download an archive without the add-on the current versions of Microsoft Internet Explorer and Netscape Navigator/Communicator will give you a choice of opening the archive or saving it to disk. If you choose to open the archive, you should be aware that the Internet Browser will probably delete the file when the browser is closed. To avoid this problem, use the Internet Browser's "save to disk" option, and specify an easy-to-remember folder, for example, c:\download.

Problems Downloading? When you download a file, many things can go wrong, resulting in a damaged copy of the file that WinZip cannot open. **The solution to most download related problems is simply to download the file again.** For more information on resolving Internet download related problems, please check the web page <http://www.winzip.com/downprob.htm>.

Note:

Many files available for download on the Internet are executable (.exe) files. The WinZip Internet Browser Support Add-On will not try to handle these files. However, if the .exe file is a self-extracting Zip file, you can open and process it in the WinZip Classic interface by choosing **Open Archive** from the **File** menu, or by right-clicking on the file and choosing **Open with WinZip**.

Related Topics:

[Downloading from America Online, CompuServe, and other online services](#)

Downloading from America Online, CompuServe, and Other Online Services

An online service with its own access software will generally have a specific folder on your computer where newly downloaded files are placed. For example, America Online uses a folder named c:\aol\download, and CompuServe uses a folder named c:\cserve\download. After you download a Zip file from one of these services in the normal manner, it's easy to use WinZip to open and process the file.

Start WinZip® by clicking on its icon, then click the **Next** button to move to the Select Zip File screen. The WinZip Wizard's Select Zip File screen shows all the Zip files in your [Favorite Zip Folders](#) with the most recently downloaded files at the top of the list, along with the folder in which they are located.

If your file or the special download folder is not shown, you can have WinZip search for the item by clicking on the **Search** button, then clicking **Search hard disk(s) on this PC**, and then clicking **OK**. WinZip will check all your hard drives and make a new list of Zip files, and update your favorite folders (the places where WinZip has found Zip files stored on your PC). When the process is complete, newly downloaded files should be near or at the top of the list. Highlight the file you wish to work with to continue with the Wizard's unzipping process.

Note:

Many files available for download on the Internet are executable (.exe) files. WinZip's Internet Browser Support will not try to handle these files. However, if the .exe file is a self-extracting Zip file, you can open and process it in the WinZip Classic interface by choosing **Open** from the **File** menu, or by right-clicking on the file and choosing **Open with WinZip**.

Related Topics:

[Downloading from the Internet](#)

WinZip Internet Browser Support Add-On

The free WinZip® Internet Browser Support Add-On will automate much of the work normally associated with downloading compressed files from the Internet. When you click on a Zip file using Netscape Navigator/Communicator or Microsoft Internet Explorer, WinZip will take over when the download is completed. WinZip automatically moves the downloaded file to your download folder (initially set to c:\download) and then, optionally opens the file.

Notes:

WinZip's Internet Browser Support Add-On is not part of the WinZip distribution package; it is available as a free download from the web page <http://www.winzip.com/ibrowser.cgi>.

WinZip's Internet Browser feature supports Microsoft Internet Explorer and Netscape Navigator/Communicator, and depends on the implementation these browsers use for "helper" applications. WinZip 8.0 has been tested with the latest release and the latest publicly available beta versions of Microsoft Internet Explorer, Netscape Navigator, Windows 95/98/NT/2000, as of February, 2000. It is possible that at some point in the future the browser vendors will release new versions of their browsers with different interfaces and conventions that are incompatible with WinZip 8.0's Internet Browser integration. If this happens, we plan to adjust WinZip to make it compatible. We cannot guarantee that this will be practical, however, and it is possible that WinZip's Browser Integration will not be available for future versions of these browsers.

Desktop Theme Installer

What's a desktop theme?

A desktop theme is a collection of desktop attributes--colors, mouse pointers, sounds, wallpaper, and so on--that create a "theme" for your desktop. Windows 95 (with Plus! installed), Windows 98, and Windows NT 4.0 (with add-on theme support installed) provide support for desktop themes. **Please read this additional information if you are using [Windows 2000](#).**

The WinZip® desktop theme installer

If the WinZip Wizard determines that you are extracting files from a Zip file that contains a desktop theme, it will automatically lead you through the simple steps required to install the theme. Just click the **Next** button and follow the simple instructions.

After WinZip has extracted the necessary files to the correct folders, it will run the system theme installer (normally Themes.Exe) to complete your installation. Here you can preview the sounds, cursors, colors, and images provided by the theme designer. (Under some versions of Windows you may need to first select the new theme from the list of available themes in the **Theme** drop-down list.) If you like the theme, just click **Apply** and Themes will convert your desktop to the new theme. If you don't like the theme, click Cancel and your desktop will be unaffected. Consult your Windows documentation or help for more information about the theme installation program.

More detail about desktop themes and the WinZip desktop theme installer is available in WinZip's [Classic interface help](#).

Note: Microsoft has not documented the format of .Theme files. The WinZip Desktop Theme Installer is designed to work with .Theme files as used by the current version of Microsoft's THEMES.EXE (4.0). It is possible that Microsoft may change the format of .Theme files or other aspects of desktop theme support and that, as a result, WinZip will no longer be able to support desktop theme installation. Current information about desktop theme compatibility issues can be found on our website at <http://www.winzip.com/thminfo.htm>.

Screen Saver Installer

If WinZip® determines that you are extracting files from a Zip file contains one or more screen savers (.SCR extension), it will automatically lead you through the steps necessary to install the screen saver. Just click **Next** and follow the simple instructions.

After WinZip has extracted the necessary files to your Windows folder, it will run Microsoft's Display control panel application to complete your installation. Here you can try out the screen saver and possibly modify its settings. If you change your mind and don't want to install the new screen saver, simply select a different one from the installer's list before leaving the Display application. Note that clicking **Cancel** from the Display application does *not* cancel installation of the new screen saver--it has already been installed. Consult your Windows documentation or online help for more information about the Display application.

More detail about the WinZip screen saver installer is available in WinZip's [Classic interface help](#).

Desktop Themes and Windows 2000

WinZip® does not officially support desktop theme installation under Windows 2000. Please read the following information carefully.

The WinZip desktop theme installer is not officially supported under Windows 2000 because Windows 2000 itself does not support themes in the same way that earlier versions of Windows did.

The initial release of Windows 2000 (build 2195) does not include the Plus! package (or its equivalent) that was available for Windows 95, 98, or NT 4.0. As a result, there are some differences between desktop theme support under Windows 2000 and earlier versions of Windows, and some potential problems that you should be aware of when using WinZip® to install desktop themes under Windows 2000:

- The system theme installer (THEMES.EXE) is included with Windows 2000, but it is installed in the Windows system folder (typically C:\WinNT\System32) rather than in a separate folder as in the past (typically C:\Program Files\Plus!\Themes).

Because theme components are often extracted to folders that are relative to the folder where THEMES.EXE is stored, installing some themes may require WinZip to extract files to the system folder. Some users may consider this to be undesirable behavior, and it is even possible for important system files to be overwritten.

- Some desktop themes specify that theme components must be extracted to the Plus! themes folder (C:\Program Files\Plus!\Themes) or to its subfolders. In order to do this, WinZip must create the Plus! themes folder if it does not already exist. Under Windows 2000, if this folder exists, the system theme installer THEMES.EXE may fail to recognize themes and theme components that are properly stored in the system folder and its subfolders. That is, you may no longer be able to use THEMES.EXE to activate themes that you have previously installed.

You may be able to correct this situation by deleting the Plus! folder, *but be certain that there are no important files in the Plus! folder or its subfolders before doing so!*

- Under previous versions of Windows, WinZip was able to tell the system theme installer which theme it should display when it starts up. This does not work under Windows 2000; when the system theme installer starts, it displays the current desktop settings rather than the theme that WinZip has just extracted. In order to view the components of the new theme, you must select it from the drop-down list labeled **Theme**.

It is possible that Microsoft might update Windows 2000 or release a Plus! equivalent that will address these issues. However, at this time WinZip does not officially support desktop theme installation under Windows 2000.

Please visit our website for current information on themes and Windows 2000:

<http://www.winzip.com/xw2kthm.htm>

[Desktop theme installer](#)

Zip comments

A Zip comment is optional text information that is embedded in a Zip file. It is often used to describe the contents of the Zip file or to provide other information that is not in the files contained in the Zip.

In the View Comment dialog:

- Click the **Close** button to close the dialog.
- Click **Font** to specify a new display font. This does not affect the comment in the Zip file, but is retained as your preference for viewing comments in future sessions.

Why aren't WinZip's e-mail features working for me?

WinZip® support for e-mailing archives requires that you have an e-mail program installed and properly configured. If there is a problem with your e-mail configuration, then these features will either be disabled or nonfunctional.

WinZip uses a Windows feature called MAPI (Mail Applications Program Interface) to "talk" to your e-mail program. MAPI is a standard interface that allows WinZip and other programs to instruct your e-mail program to create a new message, attach a file to it, etc. If MAPI is not properly configured on your system, then WinZip and other programs can't create e-mail for you. "Properly configured" means that:

- you have a MAPI-compliant e-mail program installed, and
- the e-mail program properly supports the "Simple MAPI" interface that WinZip requires, and
- the e-mail program is configured to be the default e-mail program (sometimes called the "default MAPI client").

Examples of popular MAPI-compliant e-mail programs include (but are not limited to) Outlook, Outlook Express, and Eudora.

AOL versions 4.0 and 5.0 are *not* MAPI-compliant and therefore do not support WinZip's e-mail features.

If you are having difficulty e-mailing your archives with WinZip, we have tips for some popular configurations available on our website. Please visit <http://www.winzip.com/xmapi.htm>.

The WinZip Quick Start Guide

This Quick Start Guide introduces some file compression terms, describes some of the initial steps in installing WinZip, and provides a first look at using some WinZip® features. For additional information, see the online tutorials that come with WinZip, the WinZip online Help file, and visit the WinZip web site at <http://www.winzip.com>.

What is an Archive or Zip file, anyway?

Zip files are "archives" used for storing and distributing files, and can contain one or more files. Usually the files "archived" in a Zip are compressed to save space. Zip files are often used to:

- **Distribute files on the Internet:** Only one Zip file transfer operation (download) is required to obtain all related files and file transfer is quicker because the archived files are compressed.
- **Send a group of related files to an associate:** When you distribute the collection of files as an archive you benefit from the file grouping and compression as well.
- **Save disk space:** If you have large files that are important but seldom used, such as large data files, simply compress these files into an archive and then unzip (or "extract") them only when needed.

What does WinZip do?

WinZip makes it easy for Windows users to work with archives. WinZip features an intuitive point-and-click drag-and-drop interface for viewing, running, extracting, adding, and deleting files in archives with a standard Windows interface, and also provides a Wizard interface that further simplifies the process of working with Zip files.

About WinZip's Setup Options

During the WinZip setup procedure you are asked to select either the WinZip Wizard interface or the WinZip Classic interface.

- **WinZip Wizard:** If you are new to computers, or unfamiliar with the Windows operating system, then you should first try using the WinZip Wizard to open and create your Zip files.
- **WinZip Classic:** The more powerful WinZip Classic interface is recommended if you are an experienced computer user, comfortable with using Windows and Zip files.

In the following section we will describe the WinZip Wizard Setup screens. With either interface, the setup panels provide information about the options offered. Whichever setup option you choose, you can easily switch between the two interfaces at any time with a single click, and you can always change the default settings later.

Installing the WinZip Wizard

We will refer to the on-screen panels using the title that appears at the top of each panel.

1. In the WinZip Setup panel, choose **Start with the WinZip Wizard** and click **Next**. The Search for Favorite Zip Folders panel will appear.
2. In the Search for Favorite Zip Folders panel, choose **Search Entire Hard Disk** so the Wizard can search your system for Zip files (this is the recommended option). You will see the search progress, and then a panel that says something like "17 folders were added to your 'Favorite Zip Folders'". Click **Next**.
3. The Wizard will open an Explorer window displaying the WinZip program group icons. Click **Next** to continue, and the Wizard Welcome panel will appear.
4. In the Wizard Welcome panel, click **Next** again, and the Select Activity panel will appear.

That's it, you have installed WinZip, and you're ready to begin using the WinZip Wizard. The sections below describe using the Wizard for unzipping and zipping files.

Using the WinZip Wizard

If you have just installed WinZip and selected the WinZip Wizard interface, then at this point the Select Activity panel is on the screen.

If you have previously installed WinZip, you can start a WinZip session using the WinZip program item in the WinZip program group, the Start menu, or the WinZip icon on your desktop.

Here is a brief introduction to the features of the WinZip Wizard.

Quick Unzipping with the WinZip Wizard

1. In the Select Activity panel, choose **Unzip or install from an existing Zip file** and click **Next**. The Select Zip File panel will appear.
2. In the Select Zip File panel, click on the Zip file you want to work with and click **Next**. The Unzip panel will appear.
3. In the Unzip panel, click **Unzip Now** to open the files in the archive. The WinZip Wizard will open a Windows Explorer window showing the unzipped files.

That's it, you've just unzipped (extracted) a Zip file using the WinZip Wizard. You can now work with the unzipped files, or click **Next** to choose another activity within WinZip, or close the WinZip Wizard window.

Quick Zipping with the WinZip Wizard

1. In the Select Activity panel, choose **Create a new Zip file** and click **Next**.
2. In the Choose Zip Name panel, type the name you want to use for your new Zip file and click **Next**. For example, if you are creating a Zip file that will contain some files related to yearly reports, you might type "1999 reports" as the name for your Zip file.
3. In the Select Files panel, click **Add files** to add files to your Zip file, then select the files you want to add and click **OK**.
4. Click **Zip Now** to create the new Zip file.

That's it, you've just created a Zip file using the WinZip Wizard. You can now click the **WinZip Classic** button if you would like to examine the contents of your new archive, or click **Next** to choose another activity within WinZip, or close the WinZip Wizard window.

Using WinZip Classic

Here is a brief introduction to some of the features of WinZip Classic.

Quick Unzipping with WinZip Classic

1. In the WinZip Window click the **Open** toolbar button, or choose **Open Archive** from the **File** menu. The Open Archive dialog box will appear.
2. In the Open Archive dialog box you can locate the archive you want to unzip. Then click **Open**. The contents of the archive will be displayed in the WinZip window.
3. To extract files from the archive click the **Extract** toolbar button, or choose **Extract...** from the **Actions** menu. The Extract dialog box will appear.
4. In the box labeled **Extract to:** choose the folder where you want to place the extracted files and click **Extract**.

That's it, you have extracted the contents of the archive to the chosen directory. You can now work with the extracted files, or choose another activity within WinZip, or close the WinZip window.

Note: You can also extract files from an archive in the WinZip Classic window by dragging them to the desired folder in Windows Explorer or to the desktop.

Quick Zipping with WinZip Classic

1. In the WinZip Window click the **New** toolbar button, or choose **New Archive** from the **File** menu. The New Archive dialog box will appear.

2. In the New Archive dialog box you can specify the location where you want to create the archive, and type the name you want to use for your new archive. Then click **OK**. The Add dialog box will appear.
3. In the Add dialog box select the files that you want to add to your new archive and click **Add**.

That's it, you have created a new archive. You can now examine the contents of your new archive, or choose another activity within WinZip, or close the WinZip window.

Note: You can also add files to an archive by dragging the files from My Computer or Windows Explorer and dropping the files on the WinZip window.

WinZip Classic and Wizard: Switching Interfaces

You can easily switch between the WinZip Wizard and WinZip Classic Interfaces with a single mouse click. Here's how:

In WinZip Wizard click the **WinZip Classic** button at the lower left part of the Wizard panel to switch to the WinZip Classic Interface.

In WinZip Classic click the **Wizard** button at the upper right end of the WinZip Classic toolbar to switch to the WinZip Wizard Interface.

WinZip Classic Tips

You can view the contents of most files in an archive by just double clicking on them in the WinZip Classic window.

You can extract files from an archive in the WinZip Classic window by dragging them to the desired folder in Windows Explorer or to the desktop.

Using the WinZip Classic Help menu, you can:

- work with the built-in Brief Tutorial to get acquainted with more of WinZip's features
- view collections of Hints and Tips
- find answers to Frequently Asked Questions

Zip and Unzip Files without Leaving the Explorer

To create an archive: you can select file(s) in Windows Explorer, right click, and choose **Add to Zip** from the context menu that appears.

To extract files from an archive: you can select the archive in Windows Explorer, and either:

- right click and choose **Extract to...** from the context menu that appears, or
- right click and drag the archive onto the folder where you want it extracted, and then choose an extract option from the context menu that appears.

Contacting Technical Support

You can contact our technical support staff as follows:

Internet: The best way to report problems on the Internet is with the support forms available from the "Support" link on the WinZip home page at <http://www.winzip.com>. You can also send electronic mail to support@winzip.com. We normally answer all questions within one business day.

Postal Mail: Write to Technical Support, WinZip Computing, Inc., P.O. Box 540, Mansfield, CT 06268, USA.

Please include the following information with any technical support questions:

- Is the problem reproducible? If so, how?
- What version of Windows are you running (for example, Windows 95 or Windows NT)?

- What version of WinZip are you running? If you are using the WinZip Classic Interface, choose **About WinZip** from the WinZip **Help** menu. If you are using the WinZip Wizard Interface, click the **About** button on the WinZip Wizard Welcome screen. Please include the entire "version" line in your problem report.
- If a dialog box with an error message was displayed, please include the full text of the dialog box, including the title in the title bar.

Password Security

The archive that you are extracting or installing from is password-protected. In order to continue, you must supply the correct password.

Select Folder

Use this dialog to select a folder for the operation you are performing or the configuration option you are setting.

Use the **Folders and disk drives** tree to browse your system for the desired folder.

Click **New** to create a new folder.

Click **OK** when the desired folder appears in the field at the top of the dialog.
