

# LICENSE

**Capsize** is Copyright (c) 1995 by Hiroshi Kouda & Naohiko Hashi.

**Capsize** is not, nor has ever been, public domain or free software.

**Capsize** is distributed under the User Supported software concept. Non-registered users of **Capsize** are granted a limited license to play **Capsize** for a trial period, in order to determine if it suits their needs. Any other play of **Capsize** or play past this period requires registration. Any play of non-registered copies of **Capsize** by a business, organization, or any kind of institution is forbidden.

A registered copy of **Capsize** must be treated like a book, in that the same registered copy of **Capsize** may not be played in more than one computer at the same time.

All players are granted a limited license to copy **Capsize** only for the purpose of allowing others to try it, subject to the above restrictions as well as these:

**Capsize** must be distributed in absolutely unmodified form, including ALL program, documentation, and other files.

**Capsize** may not be included with any other product for any reason whatsoever without a license from licensor. No charge or payment may be levied or accepted for **Capsize**.

Bulletin Board system operators may post **Capsize** on their BBS for downloading by their users without written permission only if the above conditions are met, and only if no special fee is necessary to access the **Capsize** files (a general fee to access the BBS is ok).

Distributors of User Supported and Public Domain software MUST obtain written permission from licensor before distributing **Capsize** and must follow the above conditions. Permission is almost always granted; this requirement is necessary to ensure protection for ourselves and **Capsize** players from unscrupulous individuals.

The following section contains information on registration and licensing.

## REGISTRATION AND ORDERING INFORMATION

Registering **Capsize** allows you to play the game after the trial period. Registered **Capsize** players get a KeyID which allow them to use full spec of **Capsize** functionality and a document on which the answer of 5 x 5 square was written by mail.

*NOTICE: You can not register **Capsize** in Win32s on Windows 3.1 environment. This is because of registry functionality shortage.*

**Capsize** registration costs 7 IRCs (International Reply Coupon) or 750 yen value Japanese postal stamps. The fee above covers the cost of postage and handling of reply mail to you.

To place an order, please use the order form on the following page.

Capsize version 1.00
