

The Family Games European Geography Tutor (Version 1.0.0)

Welcome to the **European Geography Tutor**, a simple utility that will help you learn the countries of today's Europe.

The **European Geography Tutor** has a study or browse mode ("Explore Europe") in which you get to know the locations and names of the countries, and two quiz modes. One quiz ("Find countries") gives you the name of a country and asks you to find it on the map. The other quiz ("Identify countries") highlights a country on the map and asks you to select its name from a list.

Each quiz runs through 39 European countries in random order. (The locations of three tiny additional countries - Andorra, Liechtenstein and Monaco - are indicated on the study map, but these countries are not included in the quizzes.)

This program is freeware. You may use it for as long as you wish without payment, and without having to register. You may redistribute it without restriction except:

- No files in the distribution may be altered.
- The **European Geography Tutor** may *not* be included in for-profit program collections and compilations, whether on magnetic disk or CD-ROM or any other medium without express permission of AHA! Software Inc.

We hope you find the **European Geography Tutor** useful. We would also like to suggest that you visit our **Family Games Web Center** to sample its various amusements and entertainments, and to check out our shareware games, which include:

Santa's Secret Valley

A **light-hearted graphical adventure** with a Christmas theme. Can you rescue Santa's magic items? Entertaining puzzles, a Christmas trivia quiz, delightful music

and artwork make SSV a treat for just about anyone. Ideal for kids and grown-ups to work on together!

Uncle Julius and the Anywhere Machine

Another **non-violent graphical adventure** for all ages. This one takes you into the wild world of that noted scientist and adventurer, Uncle Julius. Uncle Julius has invited you to visit, but you arrive to find that he has vanished, leaving an enigmatic note as your only clue. You'll have to attempt a rescue, but there are one or two complications. For starters, he's in another dimension...

Twisted Tails

Old-time fairy tales are given a **hilarious new twist** by inserting random words, phrases and names into the traditional story framework. Fun for the whole family; great language work-out for younger players. Illustrated! Animated! Educational fun! Exercise your creativity, or just sit back and laugh! For children *and* adults.

I Live At Santa's House

This charming "activity center" for children 3-7 lets the little ones play the role of an elf living at Santa's well-known northern domicile. Five of the game's ten activities involve toy-testing in Santa's workshop. After testing, toys can be wrapped, tagged, and put under the Christmas tree.
