Introduction

The object of Hanoi Towers for Windows is to moves all disks from the first stack to the third stack, using the second stack (the middle one) as intermediary place. The only rule is that you cannot place a larger disk on a smaller one.

You can start a new game by selecting Game | New game menu. To move a disk, move your mouse to the stack where the disk is resides, and click the left mouse button. Now, move your cursor to the destination stack and click again the left mouse button.
Alternatively, you can move a disk using <Left>, <Right>, and <Space> button of your keyboard. Select the source stack by pressing <Left> or <Right> button, then press <Space> button. Now, select the destination stack and press <Space> button again.

Freeware

Hanoi Towers for Windows is a FREEWARE. You may use it free of charge but please do NOT use it for commercial purpose. But, if you enjoy playing this game, let me knoe, please send me a postcard from where youre living. This is my address:
