## Using Numerology Star Reader 15.0

Enter all birthdays and change the current date if necessary. If you do not know any of the required items, make your best guess. After you have entered required information select any number of options. Your readings will be clearly displayed. Any day can be selected. You can check your past, present or future. For dream interpretation just enter (in small letters only) what you dreamed of (one object from your dream at a time) and click on the DRS button. So, for example, "car" is one object and "ice cream" is also one object. Your dream will be explained no matter how many things you saw in it. Please note that different things can predict the same outcome, so don't be surprised if you entered "field" and the explanation refers to both "rice" and "field." Why? Because some of the explanations go back hundreds of years! For superstitions just select a superstition from the drop down list box and click on the SUS button.

To receive your past life reading select any year between 9000 BC and 2000 AD (if you don't specify AD or BC, AD years will be used), choose the occupation and a clue from the drop down list boxes and then enter an age between 1 and 99 in the box under the "BC" year radio button. Then click on the PLIVES button and answer all the questions. Your past life reading will be clearly displayed. (If you are not sure about occupation or clue, choose "none" for both and make your best guess about the age. Now, let me explain a couple of things. Years between 9000 BC and 2000 AD refer to the time when you think your past life event took place. Age refers to your age at that time. Occupation refers to what you think you did for a living at that time. Clue refers to an event, a person, or an object in some way associated with your experience. Depending on your past life or any other paranormal experience you have had, you will be asked a number of questions. Please answer all of them to the best of your abilities and recollection!)

To compare any two individuals enter their names (first and last) and birthdays and click on the CRA button. If you do not know any of the required items, make your best guess. At any time you can create full reports by clicking on the CRR button.

To decode "hidden messages" enter the message you want to decode and click on the DEC button. Your reading will be clearly displayed.

For name interpretation enter any first name, make sure that in Your Birthday section the correct birth year is selected and click on the NME button.

**For love spells enter the first name of the individual you want to put your love spell on and click on the SPS button, then just follow instructions.**

**For pets reading enter your pet's name and change the current date if necessary. Then click on the PTS button.**

**For sports reading enter both teams, change the current date in the Select Date section to the game date, and click on the SNR button.**

**To test your intuition power select the number, the color and the shape. Do not think or try to calculate anything! Go with your "gut feeling". Flip through the options and ask yourself is this the one. After you have entered the required information click on the CIR. Your reading will be clearly displayed. Please follow instructions outlined in "Develop" and "Fine Tune" to develop and fine tune your intuition. Please note that your intuition power might fluctuate during the day! Check it just before you make any important decision!**

**For death reading enter your full name and birth year, your mother's full name and birth year, your father's full name and birth year, select your gender, your favorite color and your favorite number and click on the Death button.**
