- Registration
- Source code
- Disclaimer
- Contact Info

Description

The TAdrockAlarmList Component allows you to set an unlimited number of alarms each of which can have a very flexible format. The format can contain wildcards using the ? to match any position.

The add method requires that the input format must follow HH:MM:SS but any of the HH, MM, or SS can contain a ? to match any number in these positions.

?:?:?:? will trigger an event every second.

?:10:?? will trigger an event every second for any hour but only when the minutes = 10.

E.G: 12:10:00 - 12:10:59, 01:10:00 - 01:10:59

Refer to the help file included for more examples.

Other Files

- The **ADALARM.HIS** file contains a history of updates and changes made.
- The **ADALARM.WRI** file contains a brief description and ordering details. (This File)
- There is a Sample Program in the file **DEMOALRM.ZIP** which is in the distribution ZIP archive.

Installation

Please refer to the **INSTALL.WRI** file for full installation instructions.

Registration

Use the Registration Form (**REGISTER.WRI**) for mail-order registrations via Internet, Fax, Phone or standard Mail. We accept VISA, MASTERCARD and International Money Orders. Your Delphi control will be Emailed to you. Please provide a clearly legible Internet or CompuServe address. We do not post disks. You can use the Price List (**PRICES.WRI**) to help you determine which controls you wish to purchase and which option you choose (our controls can be purchased as Standard Registrations (no source code), Full Registrations (with control source code) and Upgrade Registrations (for those with an existing Standard Registration wishing to purchase the source code).

Source Code

Full Source code is available for this component for \$55.00 U.S. Please read the **LICENCE.WRI** file before choosing to purchase a Full or Upgrade Registration.

Disclaimer

The Author cannot and does not warrant that any functions contained in the Software will meet your requirements, or that its operations will be error free. The entire risk as to the Software performance or quality, or both, is solely with the user and not the Author. You assume responsibility for the selection of the component to achieve your intended results, and for the installation, use, and results obtained from the Software.

The Author makes no warranty, either implied or expressed, including with-out limitation any warranty with respect to this Software documented here, its quality, performance, or fitness for a particular purpose. In no event shall the Author be liable to you for damages, whether direct or indirect, incidental, special, or consequential arising out the use of or any defect in the Software, even if the Author has been advised of the possibility of such damages, or for any claim by any other party.

All other warranties of any kind, either express or implied, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, are expressly excluded.

Contact Info

Please Email us if you have any problems or find any bugs in our component - we will do our best to ensure this component works for you!
