Introduction

THAT'S EASY!

You just received one of the most powerful DB-components for Delphi.
Develop powerful and professional DB-applications just by placing one TDBExtender on your form.

It was developed to take care of the daily routines on writing DB-apps. It enables keyboard-control within the form (use ENTER as TAB, record-changing via PgUp, PgDn etc.), search on non-index-fields, bookmark-management, LookUp (using PARADOX-tabledefinitions), tableview, Memoview, filter-definitions (BDE-Filter), statusinformations and DBExceptionhandling, formglobal editing, and much more.

Copyright and Distribution policy

The trial-version of the DBExtender for Delphi 1.1 is free to distribute and use in your programs. If you distribute it you must do so without changing anything in the original zip file.

This version is for trial-purposes only. Therefore an application using this component will only be executable from within Delphi.

You use this program at your own risk. We are not responsible for any loss or damage caused by the use of DBExtender for Delphi. DBExtender for Delphi is copyright 1995, 1996 Gfi mbH

Component Installation

A short guide, who to install DBExtender for Delphi.

- Copy the files with the extension DCU, DFM, RES and DCR to some directory, say DELPHI\DBEXTEND
- Copy the files DBEXTEND.KWF and DBEXTEND.HLP to the DELPHI\BIN-directory
- Start Delphi's HELPINST
- Choose File | Open | delphi\bin\delphi.hdx
- Choose Keywords | Add | delphi\bin\dbextend.kwf
- Choose File | Save
- Start DELPHI
- Choose Options | Install Components
- Click Add
- Type in your DBExtender directory followed by DBEXTEND.DCU
- Click OK
- Click OK

You should now find two new components within the page 'Datensteuerung'.
