

RtCheckGroup Component Ver. 1.03  
Copyright 1995 Tomasz Stanczak  
Compuserve: 100735,3273

This component is something like Borland's TRadioGroup but it groups checkboxes instead of radiobuttons. Same as TRadioGroup it aligns its child controls itself, so you don't have to do it. You can set them all at once or every one separately. Because it uses bitmaps to show them, you can make it look as you want it to be.

**Files Included:**

README.WRI	this file
RTREGCG.DCR	RtCheckList Component Palette icon
RTREGCG.PAS	unit to register RtCheckList with Delphi
RTCHKGRP.*	RtCheckList itself (DCU in the demo version and PAS in the registered one)
RTCHKBMP.*	bitmap resources for the standard checkboxes
RT.DCU	unit with general functions I need
RTCONTS.*	Constants for this and/or my other components
TEST*.*	test project
RTCHKGRP.HLP	RtCheckList help file
RTCHKGRP.KWF	RtCheckList keyword file

**Installation:**

Copy the RT\*.DCR, RT\*.DCU and RT\*.RES files to the same directory, then follow the Delphi instructions for installing components. Both HLP and KWF files should probably be copied into DELPHI\BIN, the KWF is the keyword file, which can be installed with HELPINST.EXE.

Comments and suggestions always welcome.

**Registration:**

Compuserve: GO SWREG

ID# 7193 RtCheckGroup alone, license fee is \$10 plus \$2.5 s&h

ID# 7197 as part of RtControls, licence fee \$35 plus \$2.5 s&h

Registered users will receive component's full source code. Contact the author for multi-user discounts and site licenses. Shipping only through Compuserve Mail.
