

SimpleNetworkStarter

Log panel

SA4PointRule2.eps ↵

Use this panel to view the log of SimpleNetworkStarter's activities. Lines in **bold** show changes in SNS's activities and *italics* denote conclusions SNS has reached.

SimpleNetworkStarter keeps a copy of its log in **/usr/adm/SNS.log**. Note that SNS overwrites its log information in the **/usr/adm/SNS.log** file from session to session, obliterating the history. You can inspect **/usr/adm/SNS.log** by using the Edit application. Note also that **SNS.log** is in plain ASCII, without the bold and italic typefaces you see in the Log panel.

You choose Log from the SNS menu to open this panel.
