NFSManager

User Authentication panel

4padPointRule2.eps ¬
Use this panel to gain privileges to modify information in a domain.

This panel appears if you're not logged in as **root** and you use NFSManager to change a NetInfo domain.

560028_PointRule2.eps ¬

paste.tiff ¬

Type the **root** password for the domain here.
The **root** password of the domain is initially
the same as the **root** password of the
computer running the NetInfo server.

For security, the password doesn't appear as you type it.
