Expert Options panel

4padPointRule2.eps ¬
Use this panel to set mounting and buffering parameters when you import a directory.

The default values appear when you first open this panel. If you change them, the new values appear in the **opts** property for the directory. The default values are never listed for **opts**.

You click the Expert Options button in the Imported Directories window to open this window.

560028_PointRule2.eps ¬
