

Abbreviations

AND SYMBOLS FOR CHEMICAL ELEMENTS

The list of abbreviations is not intended to be all-inclusive; it does, however, contain many of those most commonly used. Symbols for chemical elements are also included. Most of these abbreviations have been normalized to one form. In practice, however, there is considerable variation in the use of periods and in capitalization (as *mph*, *m.p.h.*, *Mph*, and *MPH*), and stylings other than those given in the dictionary are often acceptable.

Material from this section appears under the heading *§Abbreviations*. The abbreviations regularly used in this dictionary appear under the heading *§Abbreviations Used in the Dictionary*
