

# Settingtheapplicationicon;↵Setting the application icon

- 1 Add the icons to the project under Images.
- 2 Bring up the Inspector and choose Project Attributes.
- 3 Place the cursor in the Application Icon field.
- 4 Drag the application's icon from the main window into the icon well.

For most applications, you'll want to use a unique icon. You can create your application icon using any graphics tool, but it must be a 48 X 48 pixel TIFFimage. Once you've created the icon for your application, add it to the project and to the Project Attributes inspector.
