

4. To Do Tutorial

# Setting up the To Do Project

Create the To Do project almost in the same way you created the Travel Advisor application. There are a few differences; each, of course, has a different name and icon. But the most important difference is that To Do has its own document type

1 Create the application project.

- Start Project Builder.
- Choose New from the Project menu.
- Name the application `ToDo`.

2 Add the application icon.

- The `ToDo` icon (`ToDo.tiff`) is located in the **ToDo** project in the **AppKit** subdirectory of **/NextDeveloper/Examples**.
- `272594_TD_SettingUp1.eps` ↩

3 Specify the To Do document type.

- Click Add.
- Double-click the new cell under the Extension column.
- Type the extension of To Do documents: `.td`.
- Drag into the image well the file **calendar.tiff** from the **ToDo** project in **/NextDeveloper/Examples/AppKit**.
- `TD_SettingUp2.eps` ↩
