

# Settingdocumenticons;↵Setting document icons

- 1 Add the icons to the project under Images.
- 2 Bring up the Project Inspector and choose Project Attributes.
- 3 Click Add Row.
- 4 Drag the icon from the main window into the icon well.
- 5 Type the file extension to be represented by this icon in the Name field of the Document Icons table.

If an application creates documents of a unique type, you should create an icon for that document type in addition to the icon for the application itself. Like the application icon, the document icon must be a 48 X 48 pixel TIFF image. Again like the application icon, you add the document icon to the project, and then to the Project Attributes inspector.
