

Coding

# 7 Editing Code

*Project Builder's code editor is deceptively simple, but powerful in its hidden capabilities. It provides many facilities helpful to programmers, including automatic indentation, delimiter-checking, name completion, multiple views, tear-off windows, and Emacs key bindings.*

- [;MovingCopying.rtf](#);movingcopying;, Moving, copying, deleting, and replacing code
- [;CheckingDelimiters.rtf](#);checkingdelimiters;, Checking delimiters
- [;IndentingCode.rtf](#);indentingcode;, Indenting code
- [;NavigatingWithinCode.rtf](#);navigatingwithincode;, Navigating within code files
- [;NavigatingBetweenFiles.rtf](#);navigatingbetweenfiles;, Navigating between code files
- [;UsingNameCompletion.rtf](#);usingnamecompletion;, Using name completion in editing
- [;DisplayingMultiViews.rtf](#);displayingmultiviews;, Displaying multiple views of code
- [;UndoingAndRedoing.rtf](#);undoingandredoing;, Undoing and redoing changes
- [;FormattingRTF.rtf](#);formattingrtf;, Formatting and inserting graphics in RTF text
- [;EditingCodeConcepts.rtf](#);formattingrtf;, [Related Concepts](#)

Then, arising with Aurora's light,

The Muse invoked, sit down to write;  
Blot out, correct, insert, refine,  
Enlarge, diminish, interline.

*On Poetry*

Jonathan Swift

I write until beer o'clock.

Stephen King
