Defined Types

NXRemoteException

DECLARED IN   remote/NXProxy.h

SYNOPSIS   typedef enum {

        NX_REMOTE_EXCEPTION_BASE,
        NX_couldntSendException,
        NX_couldntReceiveException,
        NX_couldntDecodeArgumentsException,
        NX_unknownMethodException,
        NX_objectInaccessibleException,
        NX_objectNotAvailableException,
        NX_remoteInternalException,
        NX_multithreadedRecursionDeadlockException,
        NX_destinationInvalid,
        NX_originatorInvalid,
        NX_sendTimedOut,
        NX_receiveTimedOut,
        NX_REMOTE_LAST_EXCEPTION

    } **NXRemoteException**

DESCRIPTION   These are the exceptions that the Distributed Objects system might raise as a result of a remote message gone awry.

Symbolic Constants

Timeout Constants

DECLARED IN   remote/NXConnection.h

SYNOPSIS   NX_CONNECTION_DEFAULT_TIMEOUT

DESCRIPTION   This is the default timeout for a connection (currently, 15 seconds).
