

sendIOThreadAsyncMsg:to:with:
sendIOThreadMsg:to:with:

(IOReturn)sendIOThreadAsyncMsg:(id)instance
to:(SEL)selector
with:(id)data

From the event system's I/O thread, sends the message specified by selector to instance, with the argument data. This method doesn't wait for the selector method to be called, and doesn't detect whether selector is a valid method of instance. Returns IO_R_IPC_FAILURE if an error occurred otherwise, returns IO_R_SUCCESS.

sendIOThreadMsg:to:with:

(IOReturn)sendIOThreadMsg:(id)instance
to:(SEL)selector
with:(id)data

From the event system's I/O thread, sends the message specified by selector to instance, with the argument data. This method waits until the selector method has returned. Returns IO_R_IPC_FAILURE if the message couldn't be sent otherwise, returns IO_R_SUCCESS.
