

NIFillDomainHierarchy()

SUMMARY Fill a column of a domain structure

DECLARED IN nikit/domain.h

SYNOPSIS ni_status **NIFillDomainHierarchy**(struct NIIHierarchyOfDomains **domains*, int *level*, const char **toMatch*, int *selectedLevel*)

DESCRIPTION Use this function to fill in the next column (to the right) of a browser in a NetInfo Kit panel, in response to a selection by the user. The return value of this function can be converted to an English error message using the **ni_error()** function. The **ni_error()** function is documented in the **netinfo(3)** UNIX manual page

RETURN A value indicating status, corresponding to the constants defined in the header file **netinfo/ni_prot.h**.
