

NSCustomImageRep

Inherits From: NSImageRep : NSObject
Declared In: appkit/NSCustomImageRep.h

Initializing a New NSCustomImageRep

- (id)**initWithDrawSelector:**(SEL)*aSelector*
delegate:(id)*anObject*
- Initializes a new instance so that the delegated *anObject*'s *aSelector* method will draw the image.

Identifying the Object

- (id)**delegate**
 - (SEL)**drawSelector**
- Returns the delegate.
Returns the associated draw method selector.
