

NSFontPanel

Inherits From: NSPanel : NSWindow : NSResponder : NSObject

Declared In: appkit/NSFontPanel.h

Creating an NSFontPanel

- + (NSFontPanel *)**sharedFontPanel** Returns an NSFontPanel object.
- (NSFont *)**panelConvertFont:(NSFont *)fontObject** Returns a Font object whose traits are the same as those of *fontObject* except as specified by the users choices in the Font Panel.

Setting the Font

- (void)**setPanelFont:(NSFont *)fontObject isMultiple:(BOOL)flag** Sets the FontPanel's current font from *fontObject* with *flag* indicating whether it contains multiple fonts.

Configuring the FontPanel

- (NSView *)**accessoryView** Returns the application-customized view.
- (BOOL)**isEnabled** Returns whether the FontPanel's Set button is enabled.
- (void)**setAccessoryView:(NSView *)aView** Adds *aView* above the action buttons at the bottom of the panel.
- (void)**setEnabled:(BOOL)flag** Enables or disables the FontPanel's Set button depending on *flag*.

- (BOOL)**worksWhenModal**

Returns whether FontPanel works when another window is modal.

Displaying the NSFontPanel

- (void)**orderWindow:**(NSWindowOrderingMode)*place*

relativeTo:(int)*otherWindows*

Repositions the FontPanel above or below the other windows *otherWindows* as indicated by *place* and updates the FontPanel if necessary.
