

# 5 of a Kind

© 1994 by Marko Horvatic, Zagreb Croatia

I never liked people who wrote large readme files so I'm not going to be one of those. I'm just going to say some things that could be interesting to you and some that are in my interest to write.

**First** I want to inform you that this game is a **SHAREWARE** so if you like it and want to keep it please send me my fee (\$20 might not be that much for you but is a great deal to me). Also you are free to copy it to anyone you like but not allowed to charge anything for it.

**Second** thing I want to inform you is that as soon as there are five (5) registered owners, the High Score competition starts. The winner will be pronounced on my birthday (November the 4<sup>th</sup> this very year) and all registered owners will be notified by e-mail or mail about the winner. The main prize is \$100 and if there is enough of you who registered (let's say 15) I will add T-shirt (with 5 of a Kind runner-up) for the second and third places.

**Third** thing I wanted to bug you with is my e-mail address. Please write. I need you people to tell me if there are any bugs (oh no how did I even think of that horrible word), to give me suggestions for improvement, to tell me that there no better poker game out yet (just joking)! Also you can ask for any information about the development of the game (except getting the code), any question about using it or anything at all. I promise to respond immediately !

So here it is, my internet address:

[mhzujo@cromath.math.hr](mailto:mhzujo@cromath.math.hr)

Also here is my home address where you can register (yes, register soon) or ask for any information you want:

**Marko Horvatic**  
**Naumovac 5c**  
**Zagreb, Croatia**  
**Europe**

**At the end** I would just like to tell you to appreciate the peace you are living in, and get informed about the war in Croatia and Bosnia & Herzegovina. Whatever the politicians tell you it is nothing but the cold-blooded aggression by former Yugoslavia to kill all the nations that live there and don't want to be Serbs. Remember Adolf Hitler who killed almost everyone who was no German, well they are doing the same things right now in the '90-tees and no-one can stop them but USA, UK, France and Germany. Isn't it odd that Russia is on their side, well Communists stick together. As I have read somewhere :

**If Serbs are so good how come four out of six republics of former Yugoslavia left it.**

Thank you and enjoy the game .....

Marko Horvatic
