This table summarizes some of the features available when printing in FrameMaker. The features are listed with brief explanations.

Table 1: Printing

Feature		Notes
Print Page Range	**All**	Prints all pages in a document.
	Start Page	The number of the first page to print.
	End Page	The number of the last page to print.
Printer Paper Size[1]	**Width**	8-1/2" for US Letter and US Legal; 8-1/4" for A4 letter; 7" for B5 Letter.
	Height	11" for US Letter; 14" for US Legal; 11-2/3" for A4 Letter; 10" for B4 Letter.
Scale		Percentage reduction or enlargement. FrameMaker centers the page image on the paper.
Page Order	**Odd-Numbered Pages**	Prints odd-numbered pages. Default is on.
	Even-Numbered Pages	Prints even-numbered pages. Default is on.
	Two-sided	To print on both sides of the paper: 1. Print odd-numbered pages only. 2. When FrameMaker finishes printing, turn the pages over and put them in the printer tray so they will print on the other side. 3. Print even-numbered pages only.
	Collate	If you print several copies, turn this on to print each copy separately.
	Last Sheet First	If pages come out of your printer with the printed side up, turn this on so the top page is page one.

1· For landscape documents, reverse the values used for width and height.
