

init

free

Accessing the font setFont:

font

Archiving read:

write:

font

Returns the Font object used to draw text.

free

Frees the memory used by the NXTextFormatter and returns nil.

init

Initializes a newly allocated NXTextFormatter with a Cell whose font is set to the user's default font at a size of 12 points. This is the designated initializer for the NXTextFormatter class. Returns self.

read:(NXTypedStream \*)stream

Reads the NXTextFormatter from the typed stream stream. Returns self.

setFont:aFont

Sets the font used for displaying text to the Font object aFont. Returns self.
