## Release Masterpage

885442\_paste.tiff ↵345812\_paste.tiff ↵paste.tiff ↵

This command allows you to release the assignment of masterpages from one or more documentpages.

When you click *<Release>*, the *Release Masterpages* panel will appear:

587390\_paste.tiff ↵

*Figure: The Release Masterpages panel*

In the two entry fields you can define the pages for which you want to release any masterpage assignments.

Assigned masterpages will also be released when assigning new ones to a documentpage. You assigne masterpages with the command *<Assign>* from the *<Page/Masterpage>* menu or in the Page Management panel.

In the preferences to masterpages (*.../Info/Preferences.rtf;Musterseiten;↵*) you can specify how to treat masterpage link elements, i.e. elements that appear on a documentpage because of an assigned masterpage, when the masterpage is released.

Clicking the *<OK>* button will release the masterpages. If you click the *<Cancel>* button no pages will be released.
