

# Appendix *Connecting NEXTSTEP to NFS-Networks*

paste.tiff ↵

The script, represented by the icon above, writes:

```
#!/bin/sh
cd /etc
cp hostconfig hostconfig.old
cp -r netinfo netinfo.old
cp /usr/template/client/etc/hostconfig .
cp -r /usr/template/client/etc/netinfo .
reboot
```

You can also enter these commands on the command line of a UNIX shell. You have to leave out the first line starting with <sup>a</sup>#,<sup>o</sup> though.
