

Installing the Chinese PostScript Character Set

The chinese PostScript character set consists of two files:

KaiSu-Regular.font, which has to be copied to the folder /LocalLibrary/Fonts

KaiSu-Regular.dat, which has to be copied to the folder /LocalLibrary/FontData

Please note: Installing the character set will **only** be successful if you copy the files to the LocalLibrary.

The installation will fail, if you copy them to a different library.
