

Class `java.lang.InstantiationError`

```
java.lang.Object
|
+----java.lang.Throwable
      |
      +----java.lang.Error
            |
            +----java.lang.LinkageError
                  |
                  +----java.lang.IncompatibleClassChangeError
                        |
                        +----java.lang.InstantiationError
```

```
public class InstantiationError
extends IncompatibleClassChangeError
```

Signals that the interpreter has tried to instantiate an abstract class or an interface.

Version:

1.2, 08/23/95

Constructor Index

- o **InstantiationError**()
Constructs an `InstantiationError` with no detail message.
- o **InstantiationError**(String)
Constructs an `InstantiationError` with the specified detail message.

Constructors

o **InstantiationError**

```
public InstantiationError()
```

Constructs an `InstantiationError` with no detail message. A detail message is a `String` that describes this particular exception.

o **InstantiationError**

```
public InstantiationException(String s)
```

Constructs an InstantiationException with the specified detail message. A detail message is a String that describes this particular exception.

Parameters:

s – the String that contains the detail message
