Version:

1.10, 09 Aug 1995

Variable Index

o **bytesTransferred**

`bytesTransferred` reports how many bytes had been transferred as part of the IO operation before it was interrupted.

Constructor Index

o **InterruptedIOException()**

Constructs an `IOException` with no detail message.

o **InterruptedIOException(String)**

Constructs an `IOException` with the specified detail message.

Variables

o `bytesTransferred`

```
public int bytesTransferred
```

`bytesTransferred` reports how many bytes had been transferred as part of the IO operation before it was interrupted.

Constructors

o `IOException`

```
public IOException()
```

Constructs an `IOException` with no detail message. A detail message is a `String` that describes this particular exception.

o `IOException`

```
public IOException(String s)
```

Constructs an `IOException` with the specified detail message. A detail message is a `String` that describes this particular exception.

Parameters:

s – the detail message
