# Class java.awt.Panel

```
java.lang.Object
   |
   +----java.awt.Component
           |
           +----java.awt.Container
                   |
                   +----java.awt.Panel
```
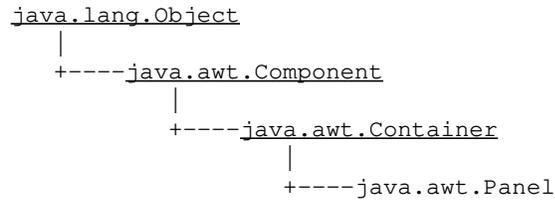

public class **Panel**
extends Container

A Panel Container class. This produces a generic container.

**Version:**
	1.5, 08/17/95
**Author:**
	Sami Shaio

# Constructor Index

o **Panel**()
	Creates a new panel.

# Method Index

o **addNotify**()
	Creates the Panel's peer.

# Constructors

o **Panel**

```
public Panel()
```

Creates a new panel. The default layout for all panels is FlowLayout.

# Methods

o **addNotify**

```
public synchronized void addNotify()
```

Creates the Panel's peer. The peer allows us to modify the appearance of the panel without changing its functionality.

**Overrides:**

addNotify in class Container
