

Start Menu

The Start Menu in Java Script It! allows for the user to easily launch applications and other utilities that it has to offer.

All the applications available are located on the left hand side of the menu. Just click on the application's button that you wish to use.

On the right hand side of the Start Menu is where the descriptions of each application will appear as you move your cursor over top of the application buttons on the left hand side. When your cursor is not over top of an application's button, the description field will display a tip of the day.

The buttons located on the bottom right of the Start Menu allows you quick acces to the Help files and Steps for Java Script It!
