

Steps

Each application in Java Script It! contains a step by step descriptive guide called Steps. To access Steps, just click on the **Steps** button located on the sidebar of each application or press **F2**. When you access Steps, a dialogue box will appear with a set of instructions that will guide you through each application.

Steps is much more detailed in instruction compared to Quick Steps, but both are related in topic. It should also be noted that Steps do not fully cover troubleshooting, browser compatibility and screen layout. You should click on the **Info** button located on the sidebar of each Application for further information.
