What is Digi Panel?

With a new designed interface and functions which gives you comfortability in using it, Digi Panel is something for every internet user. Digi Panel is a full functionall internet tool for Windows95 and Windows NT users. There are many implanted functions which helps you explore the internet. Besides text compatible editor there are specially designed Web Tools. This includes: Bookmark options which enables you to manage your own bookmarks (add, delete and goto url option). E-mail option, which gives you a possibility to add, edit and send your e-mail addresses. Digi Panel also offers you option to add your favourite Icq UIN numbers.

There is also one cute finesse built in in Digi panel, and that is Speech function. Speech function gives you opportunity to hear when Digi Panel switches from Text mode into Web mode. Digi Panel is a system tray resident software. This allows the end user to quickly access Digi Panel and input all necessary data.

System Requirements

- Microsoft Windows 95 or Windows NT
- A Pentium or better
- At least 16 Mb memory
- A mouse or other pointing device
- A SVGA color display at least 16-bit color scheme
- A Soundblaster 16 compatible sound card
- Internet Browser 3.0 or later

Uninstalling

To uninstall Digi Panel, use 'Add/Remove Programs' in Control Panel. Then choose Digi Panel and click the remove button.

Bugs

There are for now no known bugs in Digi Panel. But, if you find any of them we would be very grateful if you mail a bug description to us.
You can mail them at following e-mail address:

Support@nebula-soft.com

FAQ
